## Why MakersHub?

Most AP solutions fall short by focusing only on payments while overlooking critical steps like data capture, complex approvals, and cost tracking. MakersHub is built for businesses that need more, delivering unmatched accuracy, visibility, and control.

### Beyond Bill Pay

MakersHub provides line-level data capture, rule-based approval routing, and seamless accounting integration—all in one platform.

### Deep Accounting Integration

Our two-way sync ensures every bill, approval, and payment is accurately reflected in your accounting system—no workarounds, no missing data.

### Collaboration at Scale

Eliminate manual processes and spreadsheets. Approve bills in-platform, get real-time notifications, and keep vendors informed with automated invoice summaries and direct bill links.

### AI-Powered Bill Data Extraction

Our advanced computer vision and language models ingest, structure, and centralize bill data for smarter automation.

### Configurable Approval Workflows

Independently route bill validation and payment approvals by vendor, amount, and project for faster, more controlled decisions.

### Transparent & Secure

Every action is timestamped and traceable, providing clear visibility into bill history and financial records.

“Most people think AI is just some computer wanting to take over the world. They’d be shocked to hear that we use AI right now and that it works. **It eliminated days of data entry that no one wanted to do.** It freed up our employees to engage in the kind of meaningful work they enjoy.”

**Trey Cahill**  
President, Cahill Construction
