About the Facilitator and Author

Published Books: In the Beginning Volumes 1 and 2

Dr. Shakinah (Spiritual Psychotherapist) has created a biography of her existence over several documented lifetimes. The focus of this information is for all of humanity. Her story is our story, that is, how we came into existence, the fact that we are moving into the next cycle, (from Kali Yuga to Dwapara Yuga) and have actually moved into the new time within the last 300 years. The fact that we are still in a transitional period offers us hope in the present-day appearance of decimation, which is part of the illusion we must perceive at this time. We are all moving through this world together as one humanity. She shows us that as we are all in this together. To be successful in this transition, we must transcend illusion. We have already transcended so much, and our existence is eternal. A divine plan is at hand, and we are each a part of it. In our immortality we discover that there are actually *parallel lives*. That is, that different existences occur at the same time, and we are living simultaneously (Robin Lysne, PhD).
