

## Ascension Levels of Development

### The Light Body Experiment

The purpose of human embodiments is to attain the state of the *Christ* or a Vibrational Steward to support Mother Earth in her Ascension to becoming a Star. Many prophets of the past have written about the upcoming Earth movements and devastations awaiting us at this time within our history. However, these Earth devastations are being held in check by those who are embodying the vibrations of Unconditional Love as they support Earth in her Ascension.

*We will now explain the process of attaining the state of the Christ or embodying the frequency of Unconditional Love.*

The process of attaining the state of *Christ* or embodying the frequency of Unconditional Love is the road map of energetic changes that, when complete, allows an embodiment to resonate at the vibration of Unconditional Love.

Each person's experience of the Ascension process will be unique unto themselves, as each person has their own genetic memories, past life soul memories, and personal life dramas that are impacted along the way.

Before we get into the details of this phase of Ascension, we would like to address why the Light Body experiment is a necessary one on Earth. Five billion years ago, there was a *Fall*. Many are familiar with the *Fall of Man* or the *Fall of Atlantis*. This *Fall* that we are speaking of is the *Fall of all Creations* further into density or matter than had ever been previously experienced. This *Fall* was the result of an experiment that backfired. The purpose of the experiment was to speed up evolution.

The result was a tear between creations which resulted in the destruction of portions of each of the creations, and a separation of each Creator, including Humans, who are the creators and part of All That Is or God/Goddess in form, from our Source, i.e., the experience of separation from God.

Our creation is not the only creation that exists. Our creation is only one of 144 other creations. We are creation number 143, to be exact. Beyond each of the 144 creations exists another Creator God known as the Omnipresent One that embraces all of the 144 creations.

The Light Body experiment on Earth was originated within the Omnipresent One by many who feel karmically responsible for the backfired experiment that resulted within the fall of all creations.

Many parts of the Omnipresent One (144,000 to be exact) descended into this creation to bring the Light Body experiment on Earth to fruition.

Those who developed the Light Body experiment knew that every living thing within any creation records all occurrences that have ever occurred within that creation.

Built into our cellular structure is not only a record of everything that has ever occurred on Earth, but everything that has ever occurred within this entire creation.

As humanity's cellular structure is restored and healed, our entire creation can be restored and healed along with humanity.

The third dimension vibrates at such a slow rate that the distortions, imbalances, and disharmony can be readily seen and corrected within our third dimensional energy systems.

The same distortion, imbalance, and disharmony exists in the other dimensions as well, but because they vibrate at a faster rate; the distortions often go undetected.

A good analogy for this is that the third dimension is equivalent to taking a movie and slowing it down to a single picture frame at a time. The design of a single frame can be examined in great detail, and many of the observances that would have been missed as the movie was set in motion are now detectible.

As humankind embraces the 5th dimension and heals their experience of separation from God, the Creator of our Creation heals his/her separation from his/her God or the Omnipresent One.

Furthermore, as the distortions that caused a fall into density or matter are healed within the human form, parallel distortions within our creation, parallel creations, and within the Omnipresent One that resulted in the *Fall of Creation* are healed simultaneously.

This is why the Light Body Experiment on Earth is considered of such great importance and is so closely watched by beings from other galaxies and dimensions.

As we embody the 5th dimension, 5<sup>th</sup> dimensional beings can heal parallel distortions in their own energetic patterning that will enable them to embody their next evolutionary leap into the 12th dimension. We truly are all healing together.

Nothing within all of creation is perfect. Nor is any Master or being on any plane of reality beyond some level of distortion. It is human nature to see the Masters' as perfect. All of the problems on Earth exist throughout creation in some form.

In other words, as we on Earth heal and embrace Unconditional Love in all areas of both the individual and collective consciousness, so do all others.

In becoming *Christed*, one embodies Unconditional Love.

### ***What does this really mean?***

It means that you will view yourself as equal to anything and everything within all of creation, whether it be a Master on the nonphysical plane, or a Guru on the physical plane, or someone stuck in third dimensional thoughtform.

As you accept and have compassion for your own seeming imperfections, you will have compassion for the imperfections of others.

*Was the experiment that caused the 'Fall of Creation' a mistake?*

Of course not. It was a part of the evolution of All That Is, and in evolving beyond it, we will not need to repeat this experience again.

### **Ascension Levels of Development**

#### ***Initiations 1 – 6***

There has been much written about the process of Ascension and the building of the Light Body. It is our desire to give a brief synopsis for those listening who are not familiar with this process.

The process of Ascension is constructed by a series of tests or *Spiritual Initiations* that must be passed, and as each initiation is passed, the initiate embodies a slightly higher vibration. In order to embody a higher vibration, the process of Ascension also involves a gradual cellular detoxifying of fear-based patterning.

Nutritional detoxification programs can also impact Ascension and speed up the process but are not an absolute requirement.

In an energetic synopsis from a clairvoyant perspective, there are chakras that extend from the physical embodiment all the way up the 144 dimensions of this creation and beyond.

Our physical embodiment exists on the third dimension, and if you liken spiritual evolution to a spiral with 144 circular revolutions, the next spiral up contains 5th dimensional life form.

There are a total of 380 chakras between the 3rd and 5th dimensions.

As the embodiment increases in vibration, more of the *soul* or these chakras descend into the body.

In the first phase of Ascension, 48 chakras descend into the body causing the auric field to grow in size enabling the formation of a light body. The Light Body enables the physical form to begin to hold a new vibration on Earth.

The first 6 Initiations involve the formation of the Light Body. However, it will require many more initiations to embody all 380 chakras to take humanity into the 5th dimension.

**The following is a brief description of each of the 6 initiations involved in Ascension:**

**1st Initiation:** Mastery over the physical vehicle. This is usually passed in early childhood.

**2nd Initiation:** Mastery over the emotional body. During this process, some control over the emotional extremes that may lead to an overly addictive life experience (such as alcohol or drug abuse) is transcended.

**3rd Initiation:** Mastery over the mental body. Within this initiation, some support of one's soul's purpose on Earth comes under the direction of the mental faculties of the initiate. A portion of the Ego is relinquished as the *lower will* is surrendered. A portion of the soul descends into the physical embodiment as the vibration is now high enough to hold it.

**4th Initiation:** Renunciation. During this initiation, the foundation of fear that an initiate bases his or her existence on is relinquished and a new foundation is constructed. Often times, initiates experience a change of job or the end of a long-term marriage or some other type of partnership during this initiation. In the process, more of the soul descends into the body.

**5th Initiation:** Freedom from Blindness. During this initiation, the initiate receives a new direction and better understanding of past occurrences within their lives. In a sense, it is a rebirth into the new following a death of the old. In the process, more of the soul descends into the body, and when complete, the initiate has a fully formed Light Body, but it is yet to be activated to spin.

**6th Initiation:** Activating the Light Body. From a clairvoyant perspective, the Light Body is two inverted pyramids that create a *Star of David* or a six-pointed star that surrounds the physical vehicle.

In the process of taking this initiation, another segment of soul descends into the body and the Light Body is kicked into motion. As the Light Body spins, it expands in size and enables the physical vehicle to hold a higher vibration on Earth.

Although the 6th initiation brings about an increase in vibration, the initiate is still 6 additional initiations away from fully embodying the vibration of Unconditional Love.

(Please note that the Star of David is the Mer-ka-ba which is of electrical energy signature. No being running such signatures to any great amount will pass through the Great Central Sun filters alive. By Initiation 3000, an 80% detoxification of electrical thoughtform and

energy signatures are required).

In other words, the 6th Initiation itself is a halfway point in embracing the state of the *Christ*. Prior to completion of the 6th initiation, the initiate matches the lower vibration of the rest of humanity.

Following the 6th level initiation which enables the activation of the Light Body, the initiate now holds a higher vibration. As the initiate moves out into the world, all of those who come into contact with the new vibration now match the higher vibration.

This forces those who live or work with the initiate to begin to change. One 6th level initiate in an office will facilitate change within that entire office. Several 6th level initiates within a large corporation will facilitate change within the entire corporation.

This is all simply due to the new vibration that has been introduced. As a result, initiates often experience a shift in friendships, marriage, or work following the completion of the 6th initiation. Only those who can resonate with the new vibration will be attracted to the initiate.

Up until a decade ago, it was very difficult for almost anyone in human form to move beyond the 2nd Spiritual Initiation. This was simply as a result of missing information.

If you liken our current life form to have an operating system based on fear, and the new operating system based on Unconditional Love being a necessity for Ascension, the missing information surrounding the new operating system must be made available.

This missing information, when supplied to an initiate's Akashic Records, which is our operating system, quickly results in a rapid movement towards completing the 6th Spiritual Initiation. We currently have over 10 million people on the face of the Earth who have completed this initiation.

## **Attaining the State of a Vibrational Steward Beyond the 6<sup>th</sup> Initiation**

### ***Initiations 7-12***

The next segment of Ascension covers the 6 additional level initiations leading to the state of the *Christ* or embodying the vibration of Unconditional Love.

Those who are undergoing this process at this time are doing so in order to begin to fulfill their soul's purpose on Earth and to move into positions of leadership.

In a sense, a new wave of leadership is required that is based on Unconditional Love and collaboration rather than fear, competition, and a hierarchical structure.

Leadership will be needed in all walks of life, all industries, all professions, all governmental organizations, and it will be through this new leadership that a restructuring of human civilization based on Unconditional Love will be brought to fruition.

Many have written about the visitation of other life-forms to our planet as well as intergalactic communication. This will become a reality only as all of humanity embraces Unconditional Love.

Many wish for mass landings of other beings to restructure our civilization for us. We are here to tell you that such intervention would not be based on Unconditional Love, and therefore, would not be allowed within the policy of Intergalactic Law.

The only time such intervention would be allowed would be in the event of a nuclear war. Such an event would impact other galaxies and therefore intervention would be allowed.

Even so, such intervention would only be to prevent the nuclear incident, not to restructure our world.

It is within the human belief system to relate codependently. It is in the very nature of our genetic structure to be dependent on one another, and to harbor the wish to blame others and to not take responsibility for the reality that we have created.

Completion of the 12th initiation and embodying Unconditional Love requires that we take full responsibility for every creation within our lifetime.

If you believe that something outside of yourself can solve your current dilemma; you relinquish power to another. It is only in understanding that each of us holds the key to all of our own dilemmas that we take our power back and therefore solve the very problem we harbor.

In a sense, completing the 12<sup>th</sup> level initiation means leaving behind codependent patterns forevermore.

As all of humanity embraces their 12th spiritual initiation, human civilization will be based on Unconditional Love.

Although this may not be possible within all of the current generations of embodiments on Earth, this will be a reality for the generations that follow.

The restructuring of civilization on Earth will be a gradual process, and each of us are extended an invitation to play our part.

The following is a detailed account of initiations 7 through 12 or Ascension to the state of the *Christ*.

In completing this phase of Ascension, additional soul segments equivalent to 120 chakras are embodied.

There are 380 chakras to be embodied in order to embrace a 5<sup>th</sup> dimensional lifeform. This is still less than one half of the chakras necessary to make the transition.

In attaining the state of the *Christ* within an embodiment, segments of soul descend that vibrate in the frequencies of each of the seven rays within our 3rd dimensional form.

Without going into great detail, much like a prism or rainbow, our civilization is based upon seven main vibrations or rays that descend from the unified source that embraces all of the rays at once.

Unification of all of the seven rays is the vibration of Unconditional Love, which is the 8th Ray and is magenta in color.

As the initiate reaches the point of resonating in Unconditional Love, all seven rays become unified within the embodiment, and the auric field becomes a rich magenta in color.

To unify the 7 rays in the 8<sup>th</sup> initiation, 10 additional strands of DNA must be connected within the embodiment making a total of 12 working strands of DNA.

The connection of the DNA is completed by running frequencies that emulate the Photon Belt in vibration through the initiate's body at night while asleep.

It is through the assistance of the teams of Angels from the Great Central Sun from which the Photon Belt emanates that this becomes possible.

For those who do not know, it is the Photon Belts energy field that will gradually shift humanity into the 5<sup>th</sup> dimension.

In a sense, those attaining the state of the *Christ* are partaking in this shift ahead of time in order to assist Mother Earth in her Ascension as well as to lead or pave the way for the rest of humanity.

**7th Initiation:** Transcending Planetary Law. During this initiation, any remaining earthbound karma is transmuted. Another segment of soul descends into the body and allows for the creation of a new chakra system.

In the process of receiving a new chakra system, the information for the 10 additional strands of DNA that lead to embodying a state of Unconditional Love are transferred from the etheric body to the physical vehicle.

Although the information is transferred, none of the circuitry for the new DNA has been connected within the body but will be connected within the level initiations 8 through 12.

The new chakra system not only has a distinct new pattern within the embodiment, but the chakras themselves have the ability to both send and receive information.

The chakra system prior to the 7th initiation, can receive only, which prevents a sense of connecting with another, and contributes to the sense of loneliness and isolation prevalent within humanity.

The new chakra system allows for both sending and receiving, enabling the experience of connection or intimacy.

In the final steps of the 7th initiation, 3 seals known as the 7th seal that cover the crown chakra are removed which results in a new sense of unity and oneness with all of life.

The last step in the 7th level initiation is a surrender of the initiate to serve the divine plan above all else.

**8th Initiation:** Transcending Solar Law. The 8th initiation is one of the most lengthy initiations within this phase of Ascension.

During this process, DNA strands 2 through 8 are connected within the body, and all fear-based programming is relinquished.

The ego and negative ego are brought into alignment to serve one's soul's purpose on Earth, and duality and polarity are transcended.

Two large segments of soul descend to sit within the embodiment, one halfway through the initiations as the 5th strand of DNA is connected, and another just prior to the end of the initiation.

The ego and negative ego have run the human drama on Earth for over 40,000 years.

The ego is the part of us that creates based on personal will, seeks to control everything and everyone, and believes that it is superior and everyone else inferior.

The negative ego, in contrast, is the part of us that seeks to destroy or sabotage, relinquishes control to everything and everyone, and believes that it is inferior to everyone else.

The human personality, prior to the 6<sup>th</sup> initiation, is comprised of just the ego and negative ego, and the human dramas are simply a result of the experience of duality or the swinging between these two contrasting parts of the persona.

Following the 6th initiation, another aspect to the initiate's persona comes forth known as Spirit. Spirit seeks neither to create nor destroy, but to co-create the divine plan with God.

Spirit never controls but rather allows everyone their own drama and sees itself as equal to all others.

By the end of the 8th level initiation, the vast majority of the ego and negative ego are dismantled allowing the new aspect of spirit to govern the majority of one's existence.

Duality and polarity cause the swings of experiences within the human drama from controlling or victimizing through the patterns of the ego, to that of being controlled or victimized through the patterns of the negative ego, back to controlling and victimizing again via the ego.

Polarity also keeps in motion the experience of joy, followed by pain, followed by joy again.

As polarity is transcended, it allows the initiate to move beyond the swings of the ego and negative ego into the experience of the Spirit, which is a more consistent state of joy or bliss.

It is the pull of the planets within our astrological system that have been based on fear that keeps the swing from ego to negative ego and pain to joy in motion within the current human drama.

The 8<sup>th</sup> level initiate transcends their birth chart and the pull of the planets based on fear. This is not to say that the planets do not continue to have an influence over the initiate, but that the influence is based on Unconditional Love rather than fear.

In completing the 8th initiation, the two minor chakras that sit above the head which represent the ego and negative ego are dismantled and moved to sit on either side of the heart chakra and represent the divine feminine and masculine within.

The new inner masculine seeks to create only in resonance with God. The new inner feminine seeks to navigate that which is created such that it is in alignment with the Divine Plan.

The final step is a surrender to God, and one attains co-creator status on a Solar level.

**9th Initiation:** Transcending Universal Law. During the 9th initiation, the initiate transcends 7 universal belief systems and the 9th strand of DNA is connected.

All karma of a universal nature must be released during this initiation. Two large segments of soul are embraced by the embodiment.

***The 7 universal belief systems are as follows:***

**Law 1:** The law of the separation from God. As this law is transcended, a deeper sense of unity with God prevails. The initiate also attains co-creator status on a Universal Level.

**Law 2:** The law of energetic balance. It is the law of energetic balance that keeps the swing of the pendulum within the experience of duality in motion. As energetic balance is transcended, the initiate's life is brought to a deeper level of harmony and balance.

**Law 3:** The law of karma or indebtedness. As this law is transcended, our sense of owing another to subsist is relinquished.

**Law 4:** The law of coming and going. It is universal policy that souls can come together for only a certain length of time or incarnation, and then must separate to experience other

encounters with other souls.

As coming and going is transcended, souls who are destined to come together to complete tasks on Earth can do so without restriction.

**Law 5:** The law of female inferiority.

**Law 6:** The law of male superiority. The feminine energies and skills have been devalued, and the masculine energies and skills have been overvalued within our Universe as well as on Planet Earth. As law 5 and 6 are transcended, it allows for more of a balance between the masculine and feminine within.

**Law 7:** The law of good and evil, light, and dark. As this law is transcended, the tendency to see the world in black and white, good, and evil, is unified, and a portion of the initiate's dark side is embraced.

**10th Initiation:** The Magician. During the 10th initiation, the 10th strand of DNA is connected, and one attains the state of the Magician.

This enables the initiate to transmute energy with a thought from a lower vibration such as pain to a higher vibration such as Unconditional Love. During the 10th initiation, more large segments of soul descend into the body.

**11th Initiation:** The Sage or Prophet. During the 11th initiation, the 11th strand of DNA is connected, and one attains the state of the Sage or Prophet. This enables the initiate to see and know their own soul path more clearly. During the process, more large segments of soul descend.

**12th Initiation:** Attaining the State of the *Christ*. During the 12th initiation, the 12th strand of DNA is connected and the initiate embodies the frequency of Unconditional Love.

During the process, another large segment of soul descends. When complete, one attains co-creator status on a cosmic level.

Due to the vast amount of soul that has been embodied, the auric field of one who has become *Christed* will cover one half the United States in size.

**We will now briefly list the initiation levels 13-16, 17-24, 25-36, 37-48, 40-60, 61-72, 73-90, and 91 -108:**

**Initiations 13-16: Transcending Fear**

**Initiations 17 - 24: Transcending Personal Archetypes**

**Initiations 25-36: Transcending Group Archetypes**

**Initiations 37-48: Transcending Planetary Archetypes - *Vibrational Steward***

**Initiations 49-60: Transcending Solar Archetypes**

**Initiations 61-72: Transcending Universal Archetypes - *Enlightenment***

**Initiations 73-90: Embracing Cosmic Archetypes**

**Initiations 91-108: Attaining a State of Non-Attachment**
