About Photonic or Self Sustaining Thoughtform

What is photonic thoughtform?

Photonic thoughtform is self-sustaining in nature. Photonic biology requires not sugar to subsist but instead relies upon light and love. Light is generated as photon particles from within one's own thoughtform; and the light permeates every cell and much like a battery or heater, provides the chi for cell metabolism without the requirement for sugar. Due to the lack of a requirement for sugar, photonic biology can exist without the requirement to consume anything.

Photonic biology is related unto the Great Central Sun and the type of DNA that humans within the Sun held at a much earlier time in history of Terra. It is not only humans that will move towards this blueprint, but nature as well. One day a semi-etheric structure of all things upon Earth will be constructed in which the light shines through each form, and then as such a state of being has been recreated, all will then choose to go Home to the Tao from which you were spawned.

The journey ahead for Earth is a long one. For fully conscious species, such a journey home to the Tao could be accomplished in a single journey but probably long lifetime. Asur'Ana and Per have chosen such an outcome for their lifetimes. This is necessary to spawn a return journey path unto the Tao for Terra. There are also small pods of whales choosing a parallel future dream upon the surface of the Earth; and a few very devoted humans also in the Inner Earth as well.

Such a path requires a biology that understands transformation; Asur'Ana and Per have proven their capacity to work their way out of very difficult biological problems that they ascended into. They show the Tao that they are capable of continued modification of biology into a photonic format. This journey is not a fantasy, it is real, and it is not without its own problems. So please have compassion for Asur'Ana and Per in their choice as it has been and may continue to be a difficult path. They are not gods or gurus; they are representatives of the grand master nature within all humans that are choosing to ascend and return Home at this time.

All humans are related ultimately to the larger cranium human genetic blueprint as this is the only type of human that ever existed within the Great Central Sun. Only humans outside the Sun fell in consciousness so much that it was reflected in a diminishing cranium size and brain structure. The return journey will restore the original cranium and brain capacity of the genetic

blueprint from within the Great Central Sun. This too is coming and may take over 1,000 years of continued ascension to accomplish; but we can perceive a dream for this goal now stepping down within the Great Central Sun Dream that Earth has entered as of late.
