

MMW-2

The Act of Blessing

The love is also available to draw upon personally through the act of blessing. Blessing is an act in which love rises from the Aurora and from Earth and descends from one's Oversoul and then catches upon one's heart lotus. The heart lotus then expands, and love pours through one's etheric body and field out towards the land, sea, other kingdoms, or humans, and then the land, sea, other kingdoms, or humans with open hearts bless in return in balanced giving and receiving.

As the love flows, the inner music sweetens, the dreams lighten, and harmony is restored within and amongst those exchanging the blessings. The net result is that the sweetness of life is restored in the love that is amplified as many bless together.

In a recent dreamtime Intensive Asur'Ana and Per fostered, the thought occurred to "love and bless larger than they knew how". This triggered a response held deep within the hologram of each human and each kingdom. The blessings amplified and rolled over Earth like waves through the duration of the event. A lotus above and beneath the group formed that sustained the love over the event. The event was a magical experience of unending love that was sweet to experience and filled with magical moments of personal and collective healing. The intent to "Love bigger than one knows how" opens the heart and triggers a special part of the Tao to respond known as the Spark of the Tao.

About the Spark of the Tao

What is the Spark of the Tao? This is a part of the Tao designed to set in motion the expansion cycle and then as all parts contract, each creator returns to the spark. The Spark of the Tao is the place that emanates unending life force for the return journey Home. It is the Spark of the Tao that tracks each expansion cycle and then calls the End of Time Bell to create a contraction cycle ahead.

Alas in this time period so many creators are lost and in non-communication with the Spark of the Tao that the End of Time Bell is falling upon deaf ears. Some of the patterns and problems associated with the Spark of the Tao also occur here upon Earth; therefore, Terra is

providing many missing keys to the resolution of the Tao's own problems at this time. It is wonderful to feel as though one is contributing, from Terra's point of view. There is a deep love now flowing between the Spark of the Tao and Terra as a result.

The Spark is infusing life force upon Terra so that she has enough will to carry on and fulfill upon her ascension. The life force then interacts with the love flowing from the Heart of the Tao to amplify light upon Earth. Light is photon energy and photon energy is required to transmute density as well as create the self healing of the fractured state of being that Terra resides within. The photon energy mends the tattered and shattered parts of Terra's field, and this then leads to resurrection and reconstruction of the cellular structure of all kingdoms into a crystalline state of being. Mass ascension now can be launched as a result and shall lead to the evolution of the whole, and the purification of Earth enough, that she can enter the Great Central Sun Dream ahead and in full.

The Spark of the Tao is also available unto each ascending human that has learned to bless in the love of the Tao. Many who are ascending lose their will to ascend. This has been so for Terra and Asur'Ana and Per too. Terra often fills them with her will so that they carry on and especially through difficult moments of health issues that manifest in recent years. It was the lack of love that led to the health issues; and this is resolving itself as enough love is applied from the Heart of the Tao.

The Spark of the Tao infuses Asur'Ana and Per and Terra alike with more spark; and the spark translates into the will to carry on in the ascension ahead. Each may intend to attune to the Healing Temples for Ascension in the Aurora where one will also discover the Temple of the Love of the Tao and the Temple of the Spark of the Tao. Each temple is designed to aid the ascension by opening the heart and restoring the spark to one's existence.

Spark is an internal flame that has been vastly lost here. The internal flame has so minimized over time that Terra has fallen and fallen into the density and matter of the third dimension. Spark can be equated with life force but also the music of power and love united. As we unite power and love; it creates spark or will to ascend and evolve out of our circumstance. Therefore, learning the algorithms of love and power united as we spoke to in our last chapter is helpful to restoring the spark to one's existence.

The spark emanates from one's hologram that one is related unto. Most holograms have lost their will to exist and this is why humanity is falling towards extinction. As more receive the blessings of the Spark of the Tao, more will to ascend shall be restored unto the holographic planes, and this will foster the ascensions of more incoming little ones. We invite each to receive these blessings at this time; and intend it so in meditation or prior to falling asleep, and so it shall be.
