#### **Mahavishnu History**

The Mahavishnu arrived on Earth About 60,000 to 74,000 years ago. The first Mahavishnu to arrive were of the fourth path. These individuals were often the counselors and doctors in civilization. These individuals were gifted at examining where the diseased or discordant individual was out of balance and would apply certain vibrational techniques to correct the distortion, thus allowing for a recovery.

It is the fourth path individuals who have the role of awakening the current medical practitioners of Earth to the ascension process and the resurrection possible in ascension. As ascension becomes a more common understanding of medical practices, the current limited thoughtform surrounding aging, disease and death has an opportunity to become transmuted in the third-dimensional paradigm.

During the era of the Mahavishnu, the second to arrive were the sixth path Mahavishnu who held the vision for all manifestations on Earth. These visions were in the form of holographic blueprints that could then be translated into physicality. The sixth path individual would project the hologram of each desired creation on to the populace who would then pick up on the projection, envision it themselves, and then manifest it.

In a similar fashion, it will be the role of the sixth path individual to project the hologram of the ascension of human civilization on to humanity. As such a hologram gains strength, with more and more sixth path Mahavishnu projecting the same hologram, the human population will also begin to envision ascension. Only as they envision ascension as a possibility for their future can humanity manifest such an outcome.

This, I believe is our current work here on Earth in the years 2019-2032 for our global ascension.

#### **History of the Arcturian's blending with the Mahavishnu, a Creation of the Sirian Spiritual Elite**

The Arcturians bred with the creations of Sirian spiritual elite, the Mahavishnu which lead to 10% Arcturian human DNA during the time the these large headed humans lived upon Earth about 60,000 to 74,000 years ago.

The Mahavishnu were incubated by the Sirian spiritual elite to assist with galactic projects. When the Mahavishnu came to Earth about 60,000 to 74,000 years ago, they were assigned to oversee the red human dream. The Mahavishnu are also known as the 'large headed' ones and became the spiritual leaders to the original red seeded race who were also planted upon Earth 74,000 years previously. Mahavishnu means conscious dreamer.

The Mahavishnu had a head size and brain cavity three times larger than the other form of human species and, as such, had a much greater spiritual awareness. The Mahavishnu had the capacity to consciously tune into the many dreamtime planes surrounding Earth at that time. Such dreamtime planes (which are also known as the planes of Vishnu) would receive the projections of the God/Goddess of your solar system from your Sun, which would emit a plan or design for all incarnating species on Earth. The Mahavishnu would tune into the vision of the God/Goddess of your solar system emitted on to the planes of Vishnu and guide human evolution upon the physical plane accordingly.

Initially, ascension was reserved for those who were Mahavishnu only in form. For a Mahavishnu form to complete a biological ascension, 45,000 additional segments of DNA were embodied a little at a time until the soul and form could merge as one energetic field. It was also the responsibility of the Mahavishnu to create a pathway for those who were Bodhisattva so that they could also ascend as a species and therefore to ensure the ascension of all species on Earth. It was for this purpose that the Pyramids of ancient Egypt along with two other sites currently under water were constructed.

Genetic records clearly show that the Mahavishnu successfully carved a pathway for those humans with only 5,000 segments to first embody all 15,000 segments and then a pathway for such individuals to embody another 45,000 segments of DNA, leading to a complete ascension between the soul and form. Such a path appears to have been successfully carved during the era of the Mahavishnu for the rest of humanity. Ascension for an individual beginning with only 5,000 segments could take upwards of 500 years to complete.

Initially, the projections on to the planes of Vishnu were peaceful, loving, and allowed for evolution of humanity and all species. Then, something occurred shattering all such planes and replacing them with dreamtime that was violent. Humanity tuned into the violence and began to act it out. The Mahavishnu either died off or lost consciousness. Ascension became a form of spontaneous combustion in which both the body and soul burnt up. Eventually, ascension ceased altogether. The end of the era of the Mahavishnu was about 60,000 years ago.

### **No Reincarnation During the Era of the Mahavishnu**

The need for reincarnation to settle such debts was not always so. During the era of the Mahavishnu about 60,000 to 74,000 years ago, debts were generally completed in a given lifetime. This was possible because the lifetimes were so long (2,000 years), and one could create a debt and fulfill the same debt prior to exiting the physical plane. It was human nature during such an era to settle all debts prior to leaving so that the soul was free to either incarnate again on Earth or elsewhere within third-dimensional form.

When debts are left over from a prior incarnation, the soul becomes tied to the place of incarnation until the debt is settled in full. Over time, and with the many falls within human consciousness leading to a shortened lifespan of less than 100 years, it became impossible for any soul to fulfill all karmic debts within a single lifetime. This has resulted in the reincarnation cycle as you have known it on Earth.

### **Ascension vs. Karmic Completion**

Ascension, during the era of the Mahavishnu, was separate and distinct from completion of all karma at the end of the given lifetime. Completing karma allows a soul to incarnate anywhere else but only within third-dimensional form. In ascension from the third dimension to the fifth dimension, the soul completes all karma that ties them to the third dimension and thus is able to incarnate in the fifth dimension.

Many of the souls that ascended during the era of the Mahavishnu have recently been called back to assist our channel in her respective ascension. Each has gone on not only to experiment with fifth-dimensional lifetimes, but some have ascended from the fifth dimension and are currently incarnate in twelfth-dimensional form. This is the purpose of ascension, to allow souls to evolve on to other dimensions of experience. When ascension ceases, evolution also ceases, and so this has been true for your Earth plane for well over 40,000 years now.

In addition to the shortened lifespan, the added debt from a lifetime of fortune ties souls in a dance of karma in a manner in which they may never leave Earth at all. There has been a 'backlog' of incarnating souls that have become trapped on Earth because of the karmic dance as it currently stands. Such a backlog will be cleansed as Earth ascends. As Earth ascends, those humans who ascend along with her will clear all karma from both Earth (and of a third-dimensional nature) and move on into the fifth dimension. Those who do not clear the karma necessary to move to the fifth dimension will clear all remaining karma between their soul and Earth and move on to another third-dimensional planet to continue their evolution.
