Message to Female Seeds

If you are a female seed, call upon Asur'Ana Jasminia Vita Maha to support your mastery level dreams into Yogi pursuits.

Asur'Ana Jasminia Vita Maha is a female Yogi Master aspiration through time guiding the feminine choosing to master divine thought-stream and transcendental states of being. In this cycle of light motion ahead, there will be many more female Yogis mastering than in prior cycles of a mostly male dominant threshold of self-realization. The feminine adds a very different flavor to the concepts of self-realization than the masculine.

Splitting off of the Feminine

About 24 million years ago, the new spiraling energetic flow filtered down the interdimensional highway to our creation and impacted the Creator holding dimensions 1 through 144. The spiraling energy caused the feminine side of the Creator to split off and move to the Creation next door. Additionally, the masculine half of the Creation next door also split off and moved into our Creation. Our creation ended up with two masculine Creators in charge, which lead over time to the experience of free will, imperfection and eventually destruction. The destruction prevalent within our creation is a result of the two Creators going into competition with one another rather than working cooperatively together. One Creator went into the background, becoming a *secret government* that sought to undermine and control all of this creation. The other appeared to be in control and charge, much like the governments of our Earth, but was actually ultimately manipulated by the secret government of the other Creator.

We would like our readership to first travel with us to Dimension 4000, where there exists an Ovum that can be likened to the *Source of All Sources*, from which all form emanates. For eons of time, this dimension was made up of two planes of reality, one plane embodied by a masculine and feminine consciousness, and the other plane, which is an exact mirror of the first plane, by a feminine and masculine consciousness. All experiences of form emanating from the Ovum on the 4,000th dimension had known nothing but a peaceful form of evolution for a time span equal to many trillions of Earth years. The *God* or Consciousness beyond the Ovum wished to experience something different. And so, the two planes of reality were *intermingled*, creating one plane that was governed by two masculine consciousness, and the mirror plane that was governed by two feminine consciousness.

This shift in polarities caused a twist in the flow of energy emanating from the Ovum or Source of all Sources of our Creation, which eventually affected all of Creation with one of two energetic patterns. The twist in energy emanating from the two masculine consciousness flowed in a counterclockwise spiral, and lead to the experience of *free will*, which lead to the experience of imperfection, and then, over time, lead to the experience of destruction in some segments of creation. The energy flowing from the Ovum governed by two feminine consciousness caused the energy to spiral clockwise, which lead to the experience of total non-free will, which lead to the experience of perfection, and over time and in some segments of creation led to the experience of boredom and a lack of creative self-expression.

Inner Divine Feminine and Masculine ~ 8th Initiation

In completing the 8th initiation, the two minor chakras that sit above the head which represent the ego and negative ego are dismantled and moved to sit on either side of the heart chakra and represent the divine feminine and masculine within. The new inner masculine seeks to create only in resonance with God. The new inner feminine seeks to navigate that which is created such that it is in alignment with the Divine Plan. The final step is a surrender to God, and one attains co-creator status on a Solar level.

Ray 11

The Ray of Blending is golden pink in color and allows the masculine and feminine within to blend into a state of divine union. As this ray is embraced, issues surrounding the imbalance between the masculine and feminine within are addressed by the initiate.

As Ray 11 is embodied, the mental body, the emotional body, and the etheric body are unified with the Light Body. The emotional body is equivalent to what is left of the negative ego or inner feminine based on fear. The fragmentation of the emotional body has resulted in a sense of loneliness prevalent within humanity. As the emotional body is unified, this sense of loneliness is transcended. The mental body is equivalent to what is left of the ego or inner masculine based on fear. The fragmentation of the mental body has resulted in the experience of the need to compete with others. As the mental body is unified, the need to compete is transcended. The fragmented etheric body is the cause of the fear of death within humanity. As the etheric body is unified, the fear of death is transcended.

Races that Lost the Ability to Love

The invasive and destructive beings that invaded our creation so long ago are genetically related to other third dimensional races presently incarnate within our Universe known as the *Greys* and the *Illuminati*, as well as a twelfth dimensional race known as the *Andromedans*. Both the Greys, the Illuminati, and the Andromedans have a similar genetic problem that must also be solved. Each of these races have lost the ability to love. As a result of the loss of love within form, evolution within our Creation has become based on the attainment of power through control and abuse rather than the attainment of power through love and compassion. The Order of Dari is responsible for anchoring a new blueprint for all of third, fifth, and twelfth dimensional

form that will call for a genetic restructuring such as each race embraces love and compassion before they take their next evolutionary leap.

The Greys are well documented by many authors. It is our wish to touch on the genetic karma between the Greys and the human form so that initiates may address these issues within their own Ascension. A portion of the White Race is a result of the Greys mating with Aztec and Mayan women about 7,500 years ago. The Greys, who have time-travel capabilities, saw their own future impending cataclysm upon Earth's upcoming Ascension, and discerned that the best way to keep control of humanity was to mix their genetics with ours. Such a mixture creates karma or agreements that become inherent within our genetic structure. In blending the genetics from the Greys with the Aztec and Mayan Races, the resultant white human form lost a portion of their ability to feel. As a result, a portion of the white race became abusive, controlling and manipulative, and ventured forth to war upon and conquer other races. With a loss of emotions, compassion is also lost, which leads ultimately to present day pain and abuse prevalent within civilization. Not all of the white race has lost the ability to feel.

With a loss of emotions, compassion is also lost, which leads ultimately to present day pain and abuse prevalent within civilization. Not all of the white race has lost the ability to feel. Within the masculine form, the emotional body became fractured into many pieces as a result of the genetic blending with the Greys. This fracturing makes it impossible for a white male to feel as deeply as a female, at least until it is healed. This fracturing is repaired as an initiate transcends their 24th initiation, and the emotional body is unified with the Light Body (see above Ray 11, ray of blending).

Initiations 109-250: Transcending Archetypes of this Creation

The archetypes of this Creation include those Archetypes that govern Dimensions 1-144 and the Creator Logos for this Creation, known as Lord and Lady Alora. The archetypes that must be transcended to complete this initiation include those of separation and union, creation and destruction, masculine superiority and feminine inferiority, and karma and indebtedness. As these archetypes are transcended, a new operating system is embodied that is based on unconditional governance. During this segment of initiations, a total of 250 segments of DNA are embodied, and the remainder of the body, including bones, muscles, and major organs, are converted to crystalline in form, except for the nervous system. In the process, the initiate embraces a segment of soul that vibrates at Ray 26.

Ray 26 – Ray of Unconditional Acceptance of All Creations is the Ray of the Omnipresent All and is bright pale blue white in color. In completing this segment of initiations, a portion of the unconscious plane of reality is integrated into the Flower of Life chakra and auric pattern, causing the auric field to intensify in presence, and to grow beyond the size of the Earth. As the soul segment vibrating at Ray 26 is fully embodied, the Light Body expands in size to have 125 panels on top and 125 panels on the bottom, or a total of 250 panels.

There are nine new glands around each breast. These glands will bring forth the production of milk even in those who have never had a child. The production of such milk has been utilized in tantric lovemaking practices in times long past and is considered the elixir of the beloved.

Energetically, these new glands help to amplify the vibration of Unconditional Love which is then held by the extra layers of fat contained in each breast. The feminine form was designed to be the amplifier of love and sexual magic. The masculine form was designed to be the magician who manifests God's will upon Earth.

In the masculine form, there are new glands in the prostate and in each testicle. These glands secrete hormones that both rejuvenate the body and shut off reproduction for those who do not consciously choose to conceive a child. The production of unnecessary sperm is considered a waste of nutrients. This does not mean that a man does not continue to ejaculate but rather that the ejaculate is devoid of sperm. Additionally, these glands release substances that add to the experience of sexual excitation and the emotions of divine union and bliss between beloveds.

It is not unusual to feel discomfort in the testicles or prostate as these new glands grow and are activated. The new glands in the masculine form are activated by Initiation 1,024.

Lady Dari can be considered the feminine aspect of all of the 144,000 temples and Lord Dari the masculine aspect of all 144,000 temples. Although there are many beings who have come together to embody your Ovum of 4,000 dimensions and the 144,000 temples within the Order of Dari, we do not respond to individual names.

A state of divine union also requires that the masculine and feminine sides of an initiate come to a working balance within. It is the competition between the masculine and feminine (or between the masculine and God) that is at the root of the lack of balance required to sustain the state of divine union. For this reason, many initiates may create a partnership with a beloved or twin flame aspect at this juncture of their initiation process to better assist in correcting the imbalances between the masculine and feminine within. As two attempts to become one energy field, imbalances that could not be detected alone are revealed. As beloveds learn to surrender to one another, a deeper level of surrender to God Goddess All That Is is simultaneously attained.

The genetic corrections that are offered to those who are willing to ascend in human form at this time corrects disharmony between the masculine and feminine to a level that has not been seen in this creation for 18 million years. Even those who currently embody masculine and feminine form, such as the Sirius star system, have imbalances between the masculine and feminine that are inherent in the distortion of your creation.

About Muscle Testing or Pendulums

Muscle testing or working with a pendulum has two components necessary to their function: there is the information on muscle testing or pendulum movement, and there is an energy system that allows for proper polarization so that one will get a "yes" answer when the body knows the truth. A yes answer occurs as the energy flows to the right along the horizontal etheric ley lines of the grid work in the feminine form; for the masculine form, the energy flows the opposite or to the left in order to receive a yes answer to the truth of any question. See charts below for ascension worksheets related to the integration of the masculine and feminine within.

MARRIAGE PYRAMID	
LESSON	INTENTIONS
<p>1. Marriage creates a safe nest to exist within.</p> <p>Marriage has existed in both the pyramidal and the lotus based dreams. Lotus based dreams create a marriage founded upon two petals that become one or interlinked. In the interlinking, there is greater strength in this system of dream. Within pyramidal dreams of triangular or box shaped design, there also is a merger of the two into a single box or pyramid. This results in a lessening of one field and a strengthening of the other as information is transferred from the one perceived as subordinate to the one who is perceived as dominant. It is not always the male that plays the dominant role at home either and what occurs is that he may lose his power in marriage to the wife. So this can also occur with the husband depending upon archetypal nature. Innana had over 800 marriages and she stripped each of her slave-husbands of their chi, moving energy, and dream. Those having partnerships with any of the Anu may find that one's information flows to this archetype in the marital agreements as a result. Those of red or grand master inheritance tend to play the subordinate role to the Anu as do those of slave inheritance. Those of Jyreion inheritance will dominate with red or grand master archetypes and subordinate unto those of Anu archetype. Therefore each combination can cause the power and information and dream to move in variant directions in marriage. Moving to a lotus based dream together is the better solution for those who remain in marriages with a partner who is red or grand master in inheritance. In the lotus dream, there can be three petals; one for oneself one for the partner and one for a dream for the life dance together. This creates sovereignty and unity in the relationship instead of codependence.</p>	<p><i>I intend to release all karma for marriage that has caused transference of information and knowledge unto another in this life and throughout my ancestry.</i></p> <p><i>I intend to forgive my ancestors for participating in the dance of pyramidal marriage.</i></p> <p><i>I intend to forgive the male side of my ancestry who became dominant and stripped the feminine side.</i></p> <p><i>I intend to retrieve all information my feminine side gave to the masculine side of my ancestry in marriage.</i></p> <p><i>I intend to forgive the female side of my ancestry who became dominant and stripped the male side.</i></p> <p><i>I intend to retrieve all information my masculine side gave to the feminine side of my ancestry in marriage.</i></p> <p><i>I intend to return any information or karma that does not belong unto either my masculine or feminine side of my ancestry gained through marriage balancing the scales in full.</i></p> <p><i>I intend to create a new kind of partnership if I choose to marry that is lotus dream and unity based.</i></p> <p><i>I intend to bring forward my red nation information on lotus dream partnership for this life or my future ancestry to dream weave from.</i></p>
