

# Cookie Policy Statement

Cookies are small text files that are placed on your computer by websites that you visit. They can then be read back by the website when required. Each cookie is unique and will contain anonymous information such as a unique id, the site name and some characters and numbers.

Cookies are used to remember that you have logged in when you move to a different page, store your preferences, and improve the efficiency and experience of using the website. Often cookies are deleted automatically after you have left the website. Most web browsers automatically accept cookies, but you can usually modify your browser setting to decline cookies if you prefer. This may prevent you from using all the functions of the website.

Visit [ico cookies](#) for information on how to make your browser decline cookies.
