Available in any species of wood

**Read oak**

Our oak doors project an image of timeless appeal and enduring strength.

**Maple**

Maple is light in color. In some instances, hard maple may have curvy, bird's-eye configurations that add visual interest.

**Knotty pine**

Our knotty pine doors will help emphasize a casual or country style with their characteristic tight, close knots and light color.

**Cherry**

The wood is reddish brown in tone with a fine, straight grain. Frequently used in high-end furniture, cherry is a natural choice for upscale living.

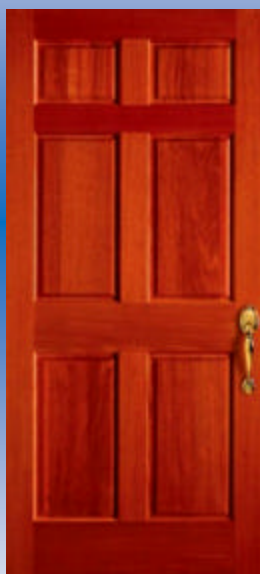

**Poplar**

The color tone can range from yellow brown to an olive green. Poplar can be stained and is often used when a very smooth paint finish is required.

**Mahogany**

A reddish-brown color and close grain pattern make this species an ideal choice for creating a rich, sophisticated environment.

**Western Hemlock**

Western Hemlock is often used with Douglas Fir, depending on the region of the country. It is characterized by a lighter, creamier color that accepts a variety of stains.

**Douglas Fir**

Clean lines and warm coloring give the vertical grain Douglas Fir enduring appeal.

**Knotty Alder**

Knotty alder has the strength of maple and the personality of pine. The wood is light brown in color with yellow and peach hues. The open, solid knots give alder a more informal presence.

More often than not exterior doors need further protection from the harsh elements of Mother Nature. High-end door manufacturing companies have been developing Ultra Block® and Water Barrier™ Technologies for exterior doors that are subject to harsher environments, Performance Series® is a selection of heavy-duty door components that deliver maximum protection for your exterior door. **Katzler Locks & Doors** offers two Performance Series options, Ultra Block® and Water Barrier™ Technologies. The combination of these two technologies create a door suitable for the toughest exposures. That protection is delivered without sacrificing the quality and craftsmanship you've come to expect from doors sold and installed by **Katzler Locks & Doors**.

### **Ultra Block Technology**

**Maximum protection against harsh weather conditions.**

**Eliminates bottom rail & lower stile decay.**

**Composite block material joint into the bottom of the stiles to eliminate water infiltration**

**Improves wrap resistant.**

**Five years limited warranty.**

### **Water Barrier Technology**

**One piece Medium Density Overlay on the out-side of door against tough weather conditions.**

**Durability and resists to moisture absorption.**

**Available in select French doors.**
