# Real Results | Real Numbers | Real Outcomes: Case Study #1

## Example One – Rockets with Boeing – Capacity Planning Models

- **Challenge:** Not enough capacity in the plant to maintain schedule – this was costing millions in production loss, overtime costs, and inefficiencies annual.
- **Solution:** Provide forecasts that identified constraints in the production schedule.
- **Results:** Provided visibility to the team that provided the ability to stay on schedule thus providing a cost savings in the millions per year.

# Real Results | Real Numbers | Real Outcomes: Case Study #2

## Example Two – Reverse Osmosis System – Parker Hannifin

- **Challenge:** Implementation of the Enterprise Resource Planning (ERP) software system was implemented poorly the previous team.
- **Solution:** Data validation, created Standard Operating Procedures, provided training, compliance with DFAR (Department of Defense), Re-engineered physical layout of the plant, process improvement, and development of the team to carry this initiative through for sustainability.

# Real Sustainable Results

- **The entire system and team became more efficient**, accountability and traceability, audit compliance, minimized risk, thus resulting in contract renewal for increased revenue and customer satisfaction.
- **These examples demonstrate** engagement with the right company and their experts and how savings can be realized even when a company thinks they believe they have the right strategic plan in place. We have coordinated and provided oversight for the creation of supply chain plans across multiple business units within many companies to leverage spend and maximize savings. When creating strategic and supply chain plans, we strive to apply a variety of value levers in order to provide optimal solutions to meet the business needs.
