

## Rocket Scientist Student to Speak at Ham Club Meeting

Lewisville Amateur Radio Association guest speaker for the July 19th meeting will be Morgan Lyons, a FCC licensed amateur radio operator and from Flower Mound, Texas. She is pursuing a doctorate in aerospace rocket technology as a full-time student at Missouri University of Science and Technology (MST). Currently on summer break from school, she will continue as the Operations Director for the MST Amateur Radio Club upon her return in the fall.

Ms. Lyons is working on her fourth rocket build after enjoying her first successful rocket launch and radio-controlled rocket retrieval in 2021. A graduate of Marcus High School in Flower Mound, her interest in rocket technology began at an early age. She has a lifelong goal to work at NASA and intends to intern there next summer. She is also a member of the Tri[oli Rocket Association, a national organization.

Lyons will be giving a PowerPoint demonstration at the Lewisville amateur radio club's July meeting, and will bring a rocket to the meeting for inspection by the attendees. The Lewisville Amateur Radio Association is a non-profit organization which offers educational and licensing opportunities to the public. Meetings are open to the public. July's meeting will start at 7:00 on Tuesday, July 19th, at the Lewisville Central Fire Station, 188 N. Valley Pkwy.
