

Spray Tanning Release Form

Please read, understand and sign the following. • Spray tanning is accomplished by application of a solution containing the active ingredient: DHA (Dihydroxyacetone). DHA is considered to be safe and has been FDA approved ONLY if you follow guidelines to protect mucous membranes. For example: your technician should offer you eye protection, inhalation protection in the form of nose plugs and/or mouth/nose mask, and lip protective covering in the form of Vaseline or a lip balm. If your technician forgets to offer any of these, you should feel comfortable asking.

What you wear, or don't wear for your spray tan is up to you and your level of comfort. Spa undergarments or pasties may be available upon request. The solution will wash out of most clothing. It is always best to wear dark loose fitting cotton clothing. It is advised to wash the undergarment or clothing worn as soon as possible after your session. • The solution will give you an immediate bronzing effect. The bronzing effect is a result of a coloring additive in the solution that will remain on the skin until your first rinse. Your tan will continue to develop over the next 24hrs • All people are different. All ingredients used in this procedure are intended for cosmetic use and generally regarded as safe. There are, however, occasions where individuals may be allergic to one or more ingredients in the spray tan solution. Please read the ingredients list if you have any known allergies.

• **Be advised there is a small percentage of people whose skin may not react favorably to spray tanning. For this reason, I do NOT advise being sprayed for the first time when your appearance is critical; (wedding/special occasion) • Caution – Pregnant or nursing women should consult their physician before using. • It is also for this reason and because so many things can stand in the way of a tan developing perfectly, that I DO NOT give refunds. However, if something has occurred that messes up your tan in any way, if at all possible, I will do my best to help fix it within 48hrs after your tan, and depending on the severity of what has gone wrong, I want you to have a positive experience and may give a big discount on your next tan. I don't believe in people throwing their money away on some things they just can't help. Here are just a few of the things that can go wrong and to be on the lookout for:** Not following prep guidelines, a dog licks you before development is complete, you have not followed aftercare guidelines, having a fungus on your skin like Tinea, etc.

Warning – This product does not contain a sunscreen and does not protect against sunburn. Repeated exposure of unprotected skin to U.V. Light may increase the risk of skin aging, skin cancer and other harmful effects to the skin even if you do not burn.

I have been provided with spray tan care instructions, which I have read and understand completely. To my knowledge, I have no medical condition or allergy which would preclude me from having this procedure done. I have been honest and accurate about the information that I have provided on this waiver. I take sole responsibility of any reaction I may have, staining of clothing and/or personal belongings. I have read and completely understand this consent form. Client
