Automated Solar-Powered Robotic Pool Skimmer

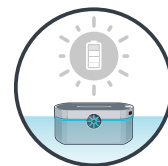

Smart Sensors

Above and underwater Infra-Red sensors ensure seamless operation and obstacles detection.

Full Coverage

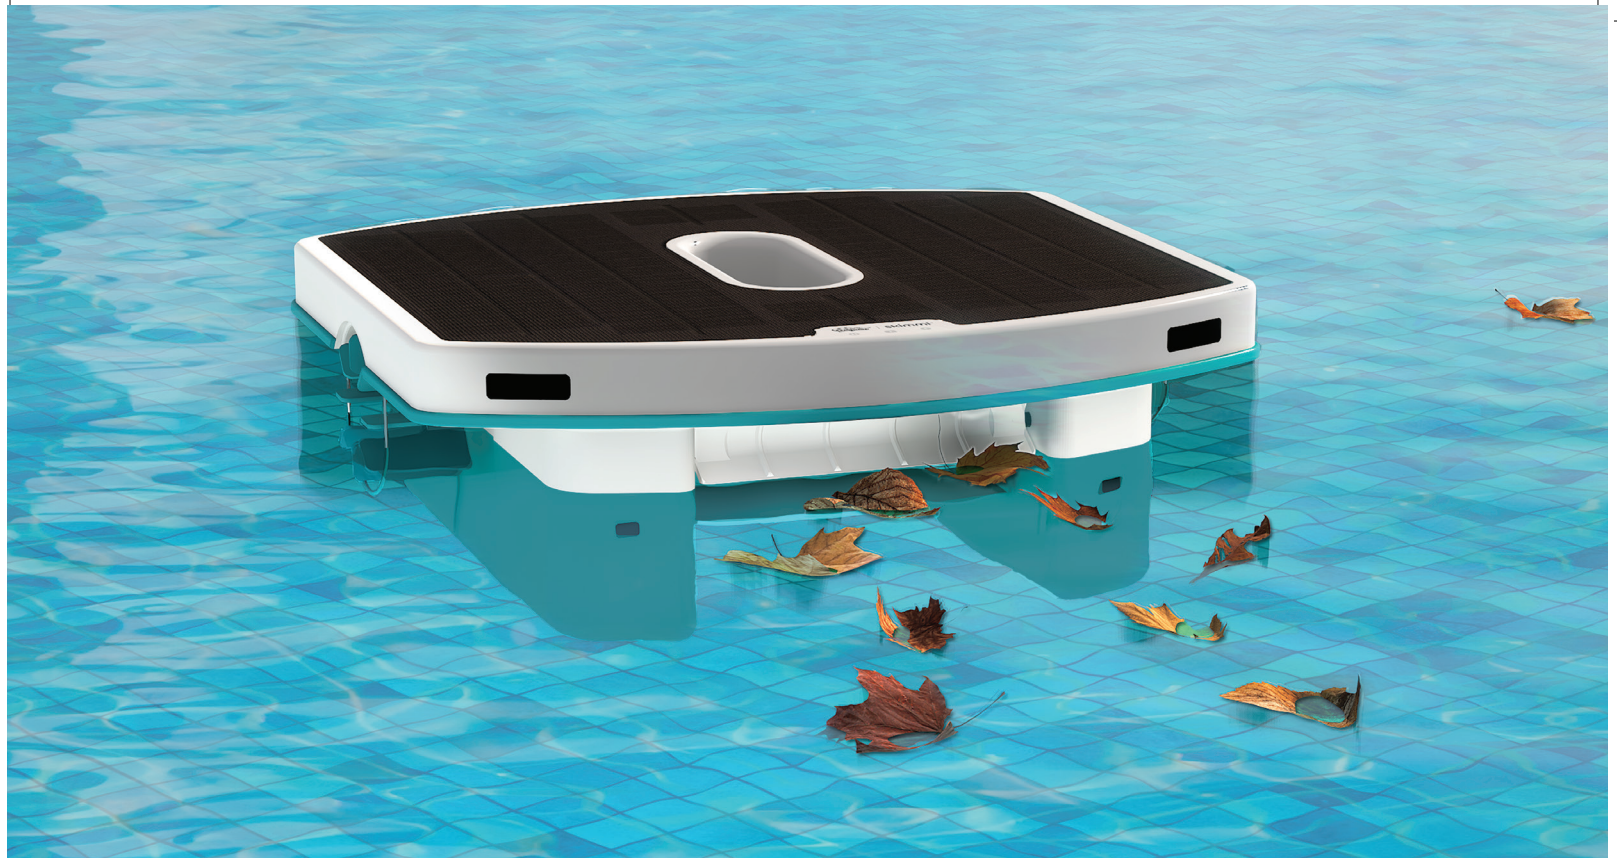

Cleans the entire pool quickly, and removes debris that clings to walls.

Smart Solar Recharge

Auto sun-detection allows Dolphin Skimmi to find sunny places in the pool to recharge itself.

Forget about the net

Experience effortless pool maintenance with **Dolphin Skimmi** - the advanced, but user-friendly robotic pool skimmer.

Equipped with an automatic navigation algorithm and smart sensors, **Dolphin Skimmi** safely paddles around your pool and collects leaves, and other debris.

The **MyDolphin™ Skimmi** app, allows you to monitor and manage cleaning modes, temperature data, solar charging status and manual control, for clean and crystal-clear pool water.
