

# *Intrepid Atlas Cleaner/Sorter*

**The Atlas Automated Wafer Cleaner/Sorter** includes all the essential steps for cleanroom support. Wafer cleaning, wafer sorting, alignment, and scribing (optional), are combined in one system. Thus, the Atlas Cleaner/Sorter assures high-yield, high-throughput processing of wafers up to 300 mm in size.

## **Features:**

- Super critical CO<sub>2</sub>, CO<sub>2</sub> (Snow)/or wet chemical cleaning and particle removal
- Plasma Cleaning
- Automated cassette-to-cassette operation (load and transfer cassette platforms, SMIF or FOUP loaders)
- Intrepid proprietary robotics
- Contamination-free class 1 handling
- Notch/flat alignment
- Wafer Scribing
- Advanced remote diagnostics

# Clean Module

## Proprietary Clean Module

- Three standard process options: Super critical CO<sub>2</sub>, CO<sub>2</sub> (Snow), or dilute RCA clean with hot N<sub>2</sub> dry
- Single wafer processing with full recipe controls
- Centering pin load system to assure alignment eliminating unwanted vibrations

# Scribe Reader

## Scribe Reader Module

- High speed camera reader for reduce misreads
- Notch/Flat aligner
- Front or backside readings

# Scriber (Optional)

## Scribe Module

- Front side or backside write functions
