

A yellow aerial lift is positioned against a large, leafy tree. The lift's arm extends upwards, and a platform at the end is near the top of the tree. The background is filled with more trees and a clear blue sky. The scene is set in a grassy area, likely a park or a grounds maintenance site.

TENDER CAPABILITY STATEMENT

Arboriculture | Grounds Maintenance | Vegetation Management

Professional environmental contracting across commercial, public and infrastructure environments

Integrated Environmental Services

A flexible capability statement for public-sector, commercial and infrastructure tender opportunities

GTC Environmental Limited

GTC is a multi-disciplinary environmental contractor delivering arboriculture, grounds maintenance, vegetation management, landscaping and associated site services.

Our teams support local authorities, commercial estates, utilities, telecoms, holiday and leisure environments, housing and infrastructure clients. Delivery can be structured as planned maintenance, reactive works, project-based packages or multi-site programmes.

The breadth of our in-house operational capability allows clients to combine routine maintenance with specialist tree work, clearance and supporting site services through one contractor.

Core service areas

- Grounds maintenance and amenity management
- Arboriculture, tree surgery and specialist access
- Vegetation, scrub and woodland management
- Highway, utility and telecoms vegetation works
- Landscaping, planting and establishment
- Fencing and site boundary works
- Watering, external cleaning and site presentation

Grounds Maintenance

Planned, seasonal and reactive maintenance for managed outdoor environments

Typical services

- Grass cutting, mowing and strimming
- Lawn and turf care
- Hedge cutting and shrub maintenance
- Leaf, litter and seasonal clearance
- Planting, beds and planters
- Sports, amenity and communal areas

Contract delivery

- Single-site or multi-site programmes
- Routine PPM schedules and reactive attendance
- Flexible frequencies to suit season and presentation
- Commercial, public-facing and residential environments
- Green-waste removal and recycling where practicable

Verges, Open Spaces & Access Routes

Efficient maintenance across larger areas, margins, paths and restricted-access locations

Operational capability

- Roadside and estate verge maintenance
- Footpath and access-route clearance
- Large-area grass cutting
- Bank, margin and boundary strimming
- Compact equipment for restricted areas
- Work-zone controls where site conditions require

Service approach

- Equipment selected to suit terrain and access
- Planned cutting cycles and seasonal response
- Presentation standards tailored to each site
- Coordination around public access and occupied premises
- Manual and mechanical methods available

Vegetation Management & Site Clearance

Mechanised and manual solutions for overgrowth, scrub, brash and difficult terrain

Vegetation services

- Scrub and brash clearance
- Brush cutting and strimming
- Utility and telecoms clearance
- Invasive vegetation management
- Woodland and access-route clearance
- Herbicide treatments where specified and appropriate

Plant-led delivery

- Tracked and remote machinery for difficult ground
- Mechanical clearance for larger areas
- Chipping and processing of arisings
- Habitat-sensitive working methods
- Site preparation and vegetation reduction
- Integration with arboriculture and grounds teams

Arboriculture & Tree Services

Professional tree management from routine pruning to complex access operations

Tree services

- Pruning, crown reductions and crown lifting
- Tree removal and sectional dismantling
- Pollarding and hedge management
- Emergency and storm-damage works
- Tree planting and aftercare
- Woodland management and site clearance

Technical delivery

- Works undertaken to appropriate arboricultural standards
- Climbing and aerial rescue capability
- MEWP-supported tree operations
- Stump grinding and removal
- Tree protection and permission support where required
- Survey-led or client-specified programmes

Chipping, Processing & Specialist Plant

Resources to support efficient tree and vegetation operations

Specialist resources

- Tracked wood chippers
- Stump grinding equipment
- MEWP and tracked access equipment
- Excavator and material-handling capability
- Commercial vehicles and towing resources
- Compact plant for constrained sites

Operational benefits

- Efficient processing of arisings on site
- Reduced manual handling
- Access across uneven and restricted terrain
- Resources matched to task and site conditions
- Ability to combine clearance, processing and removal
- Support for both planned and reactive works

Highways, Utilities & Telecoms

Controlled delivery around operational infrastructure and public assets

Relevant capabilities

- Roadside tree and vegetation works
- Utility vegetation management
- Telecoms line-of-sight clearance
- Traffic-managed work sites
- Specialist access around structures
- Vegetation clearance around operational assets

Working environment

- Site-specific planning and safe systems of work
- Coordination around access restrictions
- Work-zone segregation and public interface
- Specialist plant for difficult access
- Responsive mobilisation for infrastructure clients
- Multi-disciplinary teams for complex scopes

Secure, Controlled & Constrained Environments

Experience delivering works where access, coordination and operational discipline are essential

Site considerations

- Secure compounds and controlled-access sites
- Occupied commercial and operational premises
- Restricted working areas
- Coordination with client representatives
- Plant and vehicle movement planning
- Clean and controlled work-zone management

Integrated response

- Arboriculture and stump removal
- Vegetation clearance and processing
- Grounds and estate maintenance
- Site preparation and reinstatement support
- Specialist access solutions
- Planned and reactive attendance

Landscaping, Watering & Site Presentation

Complementary services that can be incorporated into wider maintenance contracts

Landscaping & establishment

- Soft landscaping and planting schemes
- Turfing and ground preparation
- Raised beds and planters
- Seasonal planting
- Wildflower and biodiversity areas
- Plant establishment and aftercare

Supporting maintenance

- Mobile watering for planting and landscaped areas
- External high-pressure cleaning
- Hard-surface and entrance presentation
- Seasonal and ad-hoc site attendance
- Green-waste management
- Integration with routine grounds visits

Fleet, Plant & Mobilisation

A broad equipment base to support routine maintenance and specialist works

Resource model

- Multi-skilled operational teams
- Commercial vehicles and site transport
- Ride-on and compact mowing equipment
- Tracked vegetation and arboricultural plant
- MEWP and specialist access resources
- Chippers, stump grinders and excavator capability

Tender flexibility

- Single-service or combined-service contracts
- Local, regional and national mobilisation
- Planned maintenance schedules
- Reactive and emergency response
- Short-term projects and longer-term programmes
- Scalable resources according to workload

Compliance, Safety & Environmental Delivery

Contractor assurance supported by recognised accreditation and structured operational controls

**The
Gardeners
Guild**

**REGISTERED
MEMBER**

Management & compliance

- CHAS Elite accredited contractor
- The Gardeners Guild - Registered Member
- Task-specific risk assessments and method statements
- Trained and supervised operational teams
- Public and employer's liability insurance
- Client-specific induction and site controls

Environmental approach

- Responsible green-space management
- Mechanical/manual vegetation control where appropriate
- Green-waste recycling and responsible disposal
- Site-sensitive working methods
- Consideration of habitats and biodiversity
- Efficient equipment selection and work planning

Quality & communication

- Clear scope and programme planning
- Site reporting and client communication
- Responsive management support
- Consistent presentation standards
- Ability to coordinate multiple work disciplines
- Continuous review of safe and efficient delivery

Experience Across Multiple Sectors

A transferable capability for public, commercial and infrastructure procurement

Examples of client environments

National Grid

Ofcom

John Fowler Holidays UK

Met Office

Cellnex

HMP / secure environments

Sectors we can support

- Local authorities and public bodies
- Commercial estates and facilities
- Housing and residential developments
- Utilities and energy infrastructure
- Telecommunications
- Education and community sites
- Leisure, holiday and hospitality environments

Tender adaptation

- Capability statement can be tailored to each specification
- Methodology aligned to site and contract requirements
- Service frequencies adapted to asset type and season
- Resources scaled to geography and workload
- Additional evidence, RAMS and schedules supplied as required
- Combined packages can reduce contractor interfaces

A PRACTICAL PARTNER FOR OUTDOOR ENVIRONMENT MANAGEMENT

Grounds Maintenance | Arboriculture | Vegetation Management | Landscaping | Fencing
Specialist Access | Utility & Telecoms Vegetation | Watering | Site Presentation
