

Use and Care Instructions

Thank you for your purchase from Turning South Texas!

A few little tips to keep your new purchase looking good and doing the job it was intended to do.

If you have purchased a salt box, please keep in mind that salt is a very effective desiccant. This means that any surface coming into direct contact with salt should be replenished occasionally to maintain its luster and integrity.

Your salt box will have been treated with lemon oil prior to shipping. That should protect the salt box for at least six months. At the end of those six months, and at least annually thereafter, please perform the following.

1. Empty the box of salt and wipe the interior clean with a slightly damp cloth.
2. Once the box is completely dry, lightly oil the interior with lemon oil or a food safe oil of your choice. If you like, the exterior of the box may also be oiled. Use as much or as little as you like on the exterior.
3. Allow the oil to penetrate the interior for at least 5 minutes before removing the oil by rubbing the interior with a soft, clean, dry cloth.
4. Allow the box to sit with the lid removed for at least an hour before refilling with salt.
5. Refill the box with salt and get back to your day.

Again, thank you for your purchase, and please visit our web site by scanning the code below.
