

## Basic Sculpture Mold Making and Casting

This workshop will focus on the brush-on mold process.

The student will supply a basic form to be molded (mainly from one of our previous workshops). You will be guided through the process of capturing the sculptures shape and details with the rubber mold. You will also be instructed on creating a plaster mother mold on the outside of the cured rubber. After the mold is complete we will make a plaster cast of the original sculpture. We will also discuss other types of mold making and casting techniques.

\$575.00

Two Weekends four hours each day.  
October 13-14 and 20-21

\$100.00 for supplies

Materials supplied

Smooth-On (brush on 40 rubber)

Molding plaster

Hemp fiber for the mother mold
