Whether you are choosing to go vegan for the animals or a plant-based diet for your health or the environment, getting started can be confusing.

This guide is to help you discover a whole new world of food and flavors that won't disappoint. Ok....some may....but don't let that stop you. There will be plenty more that will ROCK! This guide is not intended to include EVERY vegan food option that is available; we just want to get you started with the basics. Be ready to take some time to explore the grocery stores to find all of the amazing plant-based choices.

Many things that you already eat may be plant-based. Other things that you wouldn't imagine have animal products in it, do. Bread, for example, often has milk in it. The most important thing to do is to read ingredients on **everything**. When a label says "this may contain" or "made in a facility that uses", it is not made with that ingredient; it is an allergen disclaimer.

Throughout the brochure, the brands will be listed with the following code for stores in which they can be found.

T=Target WF=Whole Foods C=Cub CO=Co-Ops W= Walmart
FT=Fresh Thyme TJ=Trader Joe's H=HyVee A=All Grocery Stores

Ingredients to Avoid

- Honey
- Beeswax
- Casein or Caseinate is a dairy product
- Confectioner's Glaze on candy. Also listed as Resinous Glaze, Shellac, Natural Glaze, or Pure Food Glaze. This is made from bug secretions.
- Whey (often found in bread and sweets)
- L. Cysteine (often found in bread products)
- Gelatin

Meat Replacements
