

## **Augusta Shores Owners Association Solar Panel Policy**

The Augusta Shores Owners Association in cooperation with the Architectural Committee wish to promote energy awareness and help support the reduction in our individual carbon footprint. In order to preserve the natural beauty of Augusta Shores we have adopted a policy regarding the installation of solar energy panels.

The following requirements will need to be followed by homeowners looking to install solar energy panels on their property.

1. All solar energy panels and related equipment needed to operate the system shall be affixed or contained within the main home (or garage) structure. No free-standing power array or control boxes will be permitted.
2. Homeowner must submit detailed plans showing the layout and location of the system.
3. Plans will need to be approved by the architectural committee before work can begin.
4. All work must be performed by a professional, licensed & insured contractor.

Please don't hesitate to contact any ASOA Board member or Architectural Committee member if you have any questions regarding this policy.
