Whether you're in the market for hardwood, tile, carpet, or any other type of flooring, we have you covered. Contact us today to learn more about our products and services, and let us help you transform your space with beautiful, durable floors.

ABOUT OUR PRODUCTS

Our products are 100% waterproof, so they can be installed in previously unthinkable areas, such as bathrooms or kitchens.

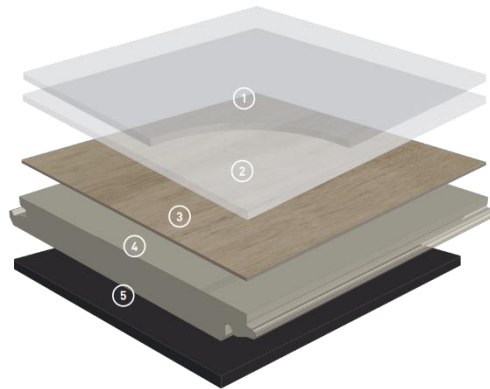

It shows a very satisfactory behavior against fire with a "B Fl-s1" classification given its low combustibility, its inhibition ability in the propagation of flames and its limited production of smoke and toxic gases.

Thanks to the EIR technology (Embossed in register), the aspect of the slats is very similar to actual wood. Matching the roughness of the finish with the veining of the slat, more pronounced pores are formed, getting a more natural feeling.

It is a very easy product to clean, so it prevents the adherence of dust mites and other allergens. does not give off no type of emission or odor that can be harmful to people pets.

1. Extra strong UV protective layer

Provides maximum resistance to UV rays from the sun, so the colors keep stable and do not lose sparkle. This top layer prevents deterioration due to scratches, stains or slits.

2. High resistance PU protective layer

Composed of ceramic micro-particles, it prevents wear and ensures an extremely high durability acting as an extra protective layer.

3. PVC decorative sheet

The PVC top layer is the element that provides the design and unique color of each plank to this technical pavement.

4. SPC board

The SPC vinyl core is characterized because it is dense, 100% waterproof and guarantees perfect resistance against expansion and dilation.

5. EVA base with high density PE

Fits small subfloor imperfections providing cushioning. It is resistant to moisture and temperature changes.

6.5mm thick

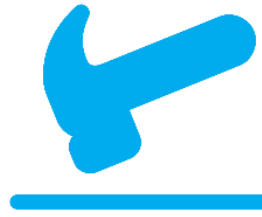

A perfect thickness, the slats are easy to handle and install.

Acoustic Isolation

Walking Comfort

Impact Resistance
