

# What can TGL Consulting do for you?

Tom Laubenthal is a nationally recognized subject matter expert with asbestos and lead-based paint issues. TGL Consulting can help your company in many ways...

## Technical writing/editing

Standard operating procedures, quality manuals, field procedures, field training and evaluation tools. Also, regulatory compliance documents, field reports, document development and review/evaluation and more. Certified Inspector, Management Planner and Project Designer; review asbestos inspection reports, asbestos abatement work plans, AHERA 3-Year Re-inspection and 6-month surveillance reports. Certified LBP Inspector and Risk Assessor; review LBP inspections, risk assessment reports and lead hazard control plans for EPA/HUD compliance.

## Training and training development

For regulated certification programs, we have set up affiliations with established training groups including The Environmental Institute and Greenville Technical College for asbestos and LBP refresher programs. NIOSH 582(e) courses are also available. Please inquire for details.

## Legal Services

Regulatory matters, enforcement, problem solving, documentation reviews, expert witness testimony.

## For established training programs:

Training material and PowerPoint development and updates, corrections to current standards or just sprucing up for a newer look to your product.

## For consulting firms and labs, in-house training needs:

Expanding on base training programs with “lunch and learn” programs of various lengths on a wide variety of topics that can be presented remotely. Programs can be developed for a better understanding of their work, role in the regulatory process and method issues. This will help lab personnel as many in the lab are never exposed to conventional training outside the lab.

***Providing high quality expert asbestos and LBP training and professional consulting services for over 35 years***
