

Asbestos & LBP Training Program Development and Updates

Tom Laubenthal of TGL Consulting, Inc. is one of the most experienced and respected trainers in the US.

Refresher Program Updates

One of the biggest complaints of those sitting through refresher programs is that it is the same old material every time! Why is this? There is so much to talk about from industry information to the fine points of regulations and compliance. While at The Environmental Institute, Mr. Laubenthal was the principal writer of 90%+ of the materials presented there to great reviews from years of clients. Retaining or bringing in new clients requires giving them a product that keeps them engaged. TGL can do that for you too. Individual sections to day-long programs.

Exam updates

Are still using the same exams you wrote from years ago? Exam questions are deceptively difficult to write. TGL has significant experience here. We can update to a blueprint or help you establish one to be sure your exams cover the materials presented and to meet State/Local accrediting body requirements. We can update or rewrite your exam bank.

Initial program development

New to training? We can help you too. Initial programs are often quite regulated by federal and State/Local program rules. Let me know of your interest and where you will operate, and we can determine what is best for you and to meet your needs and existing regulatory program requirements.

Online programs

TGL can help you with content and presentation for online programs. We can also work to have your programs recorded for in-house or regulated refresher programs. Drop me a line to talk about the possibilities.

So...do you or your staff have the TIME to develop, review and update your training materials?

Often not.

I can help! I have worked for major corporations and industry firms to develop, review and update training materials.

Drop me a line at tglconsulting@att.net and let's talk about what we can do to develop or update your programs to current regulations and general industry practices.

Providing high quality expert asbestos and LBP training and consulting services for over 35 years
