

## CADM205 – Chapters 9 and 10 Lessons and Assignments

Chapters 9 and 10 projects will give students the opportunity to follow instructions and successfully accomplish tasks in a timely manner:

1. Follow instructions the textbook to successfully accomplish the Revolved Design: Pulley. Submit in accordance with the dates in the syllabus.

2. Follow instructions the textbook to successfully accomplish the Thin-Walled Design: Oil Sink. Submit in accordance with the dates in the syllabus.

Glossy prints will be made as part of the student portfolio. Also, student will make three dimensional prints of the projects as part of their advanced CAD projects. Let me know if you have any questions.
