FIRM INTRODUCTION:

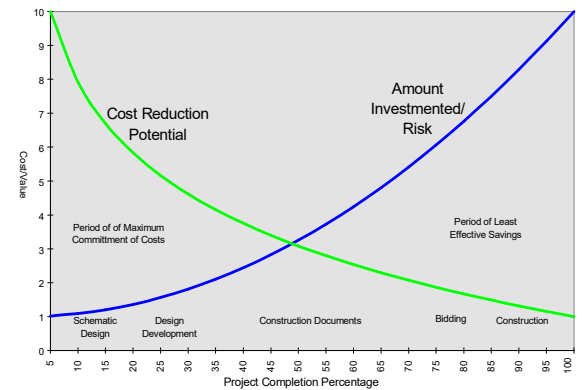

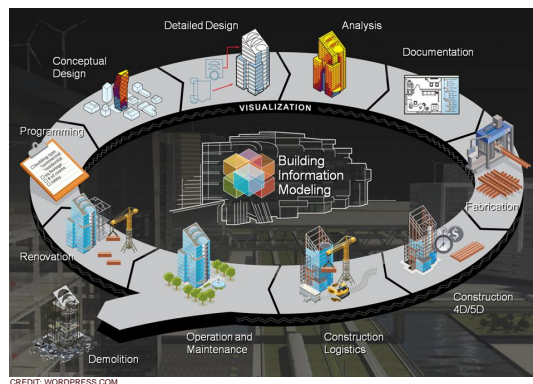

Longeau Design Group, Inc. (LDGI) is a CVE-certified, service disabled veteran-owned small business (SDVOSB) providing complete Architectural Services and Green Building Designs by accredited and licensed professionals.

The diversity of our portfolio of work and our depth of knowledge with different building genres allow us to consistently approach each project in a fresh and innovative way. This enables LDGI to apply its wide range of experience, including Federal work, residential hospitality, and health care to the different environments within our projects.

OUR PHILOSOPHY:

For Veterans by Veterans, with patients and providers in mind, our philosophy is to design a comprehensive healing environment using Lean principals to improve efficiency and work flow as well as industry recognized Evidence Based Design (EBD) to promote and acknowledge the physical and spiritual wellness of the patients and health care providers we are designing for.

Our work philosophy embraces innovation and flexibility, which translate into increased efficiency and a unique approach to solving complex problems. As a full-service architecture firm, we can provide our clients with complete support from conceptual study through to construction administration.

OUR MISSION:

We exist to create innovative healing spaces with Veterans, Providers, and Clients in mind while serving our community at large! Communication is key to our success. We have the green thumb and work with you to add value to your project and ensure your vision comes to fruition on time and within budget.
