

# LATEST AND GREATEST

 Designed & hand crafted in the USA

## 24x48 Fieldstone Tile

The 24" x 48" Fieldstone Tile Stamp features huge tiles with tight V-groove joints, creating an elegant, high-end look.

Designed as a magnetic seamless pattern, it ensures a flawless, continuous finish. Its realistic fieldstone texture holds color exceptionally well.

## Fieldstone Cobble

The Fieldstone Cobble Magnetic Stamp combines innovative seamless magnetic technology with the most detailed cobblestone texture ever produced, with stone sizes ranging from 7"x7" to 7"x11" and a tight V-groove joint.

## Fieldstone Texture

The Fieldstone seamless texture skin offers the most dense, detailed texture for premium decorative concrete. Its superior density creates a realistic fieldstone pattern that holds color exceptionally well, perfect for wall caps and more.

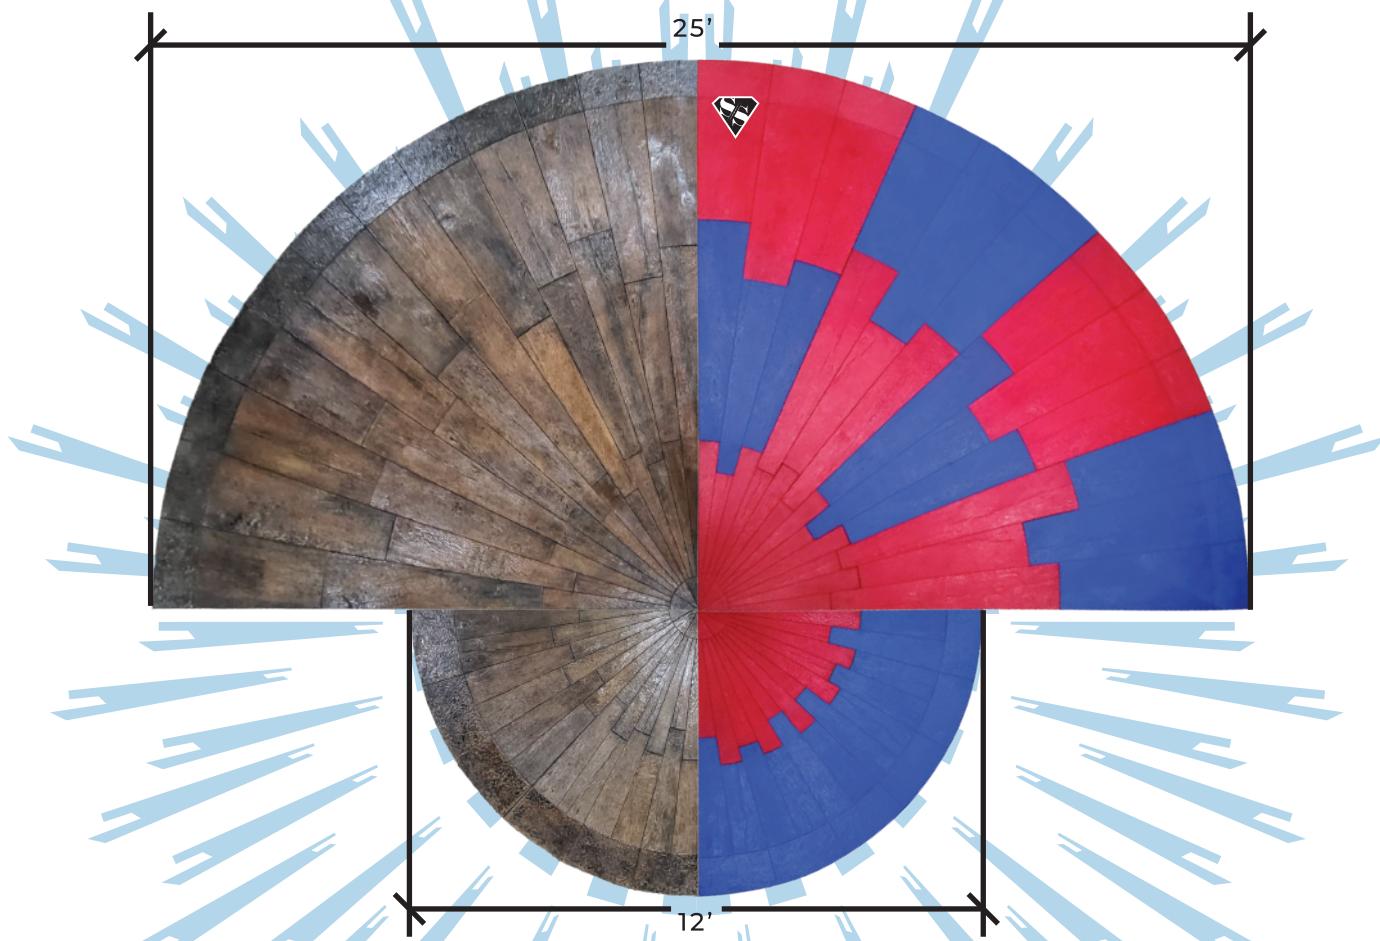

## 6" Boardwalk Planks(With Nails)

**Always a favorite**, now available in **Super Stamp**, this wood grain pattern is less than half the weight for easier handling without sacrificing detail! Wood grain has never been more easy to use than this 6" wide, planked wood pattern featuring knots. This texture is taken straight off the real thing for the best possible grain impression.

# RELENTLESS INNOVATION

## SUNBURST RECLAIMED TIMBER

Step into the enchanting world of concrete design with Proline's latest masterpiece, the Sunburst Reclaimed Timber super stamp. This captivating imprint brings a touch of rustic elegance to any space. Elevate your decorative concrete projects with the Sunburst Reclaimed Timber super stamp, a revolutionary composite creation that not only boasts a lighter weight but also delivers unparalleled strength, transforming every surface into a testament of enduring beauty and innovation.

### Custom Stamps

#### Turn Your Logo into a Lasting Legacy!

Our custom concrete stamps allow you to permanently embed your logo or special design into walkways, courtyards, and entrances....

### Pro-Finish TDC

Finishing aid for freshly poured concrete. Lubricates the surface during the floating and troweling stages for a better, faster finish. Pro-Finish TDC slows down the surface drying and eliminates the need for water during finishing. Increases surface compressive strength, reduces efflorescence, and minimizes checking, scaling, and surface cracking.
