

Radar Rabbit Reader's Guide

Before reading Radar Rabbit with your child, we encourage you to review the following sections of the book:

- **Why this book?**
- **Important Considerations for your child's safety**
- **What is RADAR®?**

These sections provide helpful context and encourage you to think about your child's safety in situations beyond those covered in the story.

To be sure, some of the scenarios in the book may not be applicable. For example, your child may not ride the bus. However, the safety guidelines provided for this particular scenario are still applicable for other modes of transportation.

As you read together, pause occasionally to ask questions and evaluate your child's understanding. Feel free to introduce your own scenarios to encourage discussion and reinforce key concepts. If you need assistance, visit www.radartherabbit.com and send us a message—we are always glad to help.

Pro Tip

Teach your children how to access the 911 feature on your cell phone. While you don't have to share your passcode, it is important that they know how to contact emergency services in case you or another family member needs immediate assistance.
