

Where Good Stewards Meet Their Environment

NEPA – Project Management & Project Teams

This 3-day course highlights instructing attendees the effectiveness of leading teams and how to be effective members by understanding controlling processes of a NEPA project and plan development. Attendees will be introduced to various project management professional (PMP) skills that assist in time management, overall project management, team management, and decision-making methods.

Objectives

- Know critical quality control milestones for the NEPA process.
- Judge the quality and adequacy of a NEPA document.
- Know how to set resource, time, and quality parameters for NEPA analysis and documentation.
- Know techniques for communicating with and managing people for efficient NEPA analysis.
- Know what is important to manage and monitor for one NEPA project, or multiple projects.

Audience

- Federal, State, and Local agency environmental officials
- Non-Profit Environmental Stakeholders
- Environmental and Engineering Consultants
- Oil & Gas Environmental Professionals
- State and Local Transportation Officials
- Private Sector Stakeholders

Components

- Environment in which NEPA projects operate
- The role of the NEPA project manager
- Project integration management
- NEPA project scope management
- NEPA project resource management
- Project stakeholder management
