Generic Model of Social Context

Social Strategy → Strategy (mission, vision, goals, objectives, and key performance indicators) of the society

↓

Social Architecture → Framework of guiding principles that define the scope and nature of the society

↓

Social Systems designed through Social Engineering → Social Systems which are designed to realize the Strategy and which are aligned with the Social Architecture

↓

Operating Model → Defines how the social systems operate both internally and with other components of the Social Architecture.

↓

Social Control Systems → Social Systems and techniques which are specifically designed to enable control of the society at all levels.

↓

The weight of the State

The Mind of the Citizen
Characteristics and capabilities of the citizenry

You are here. →

→ Specific capabilities and skills which are conditioned into the citizens resulting in behavior that creates the social reality.
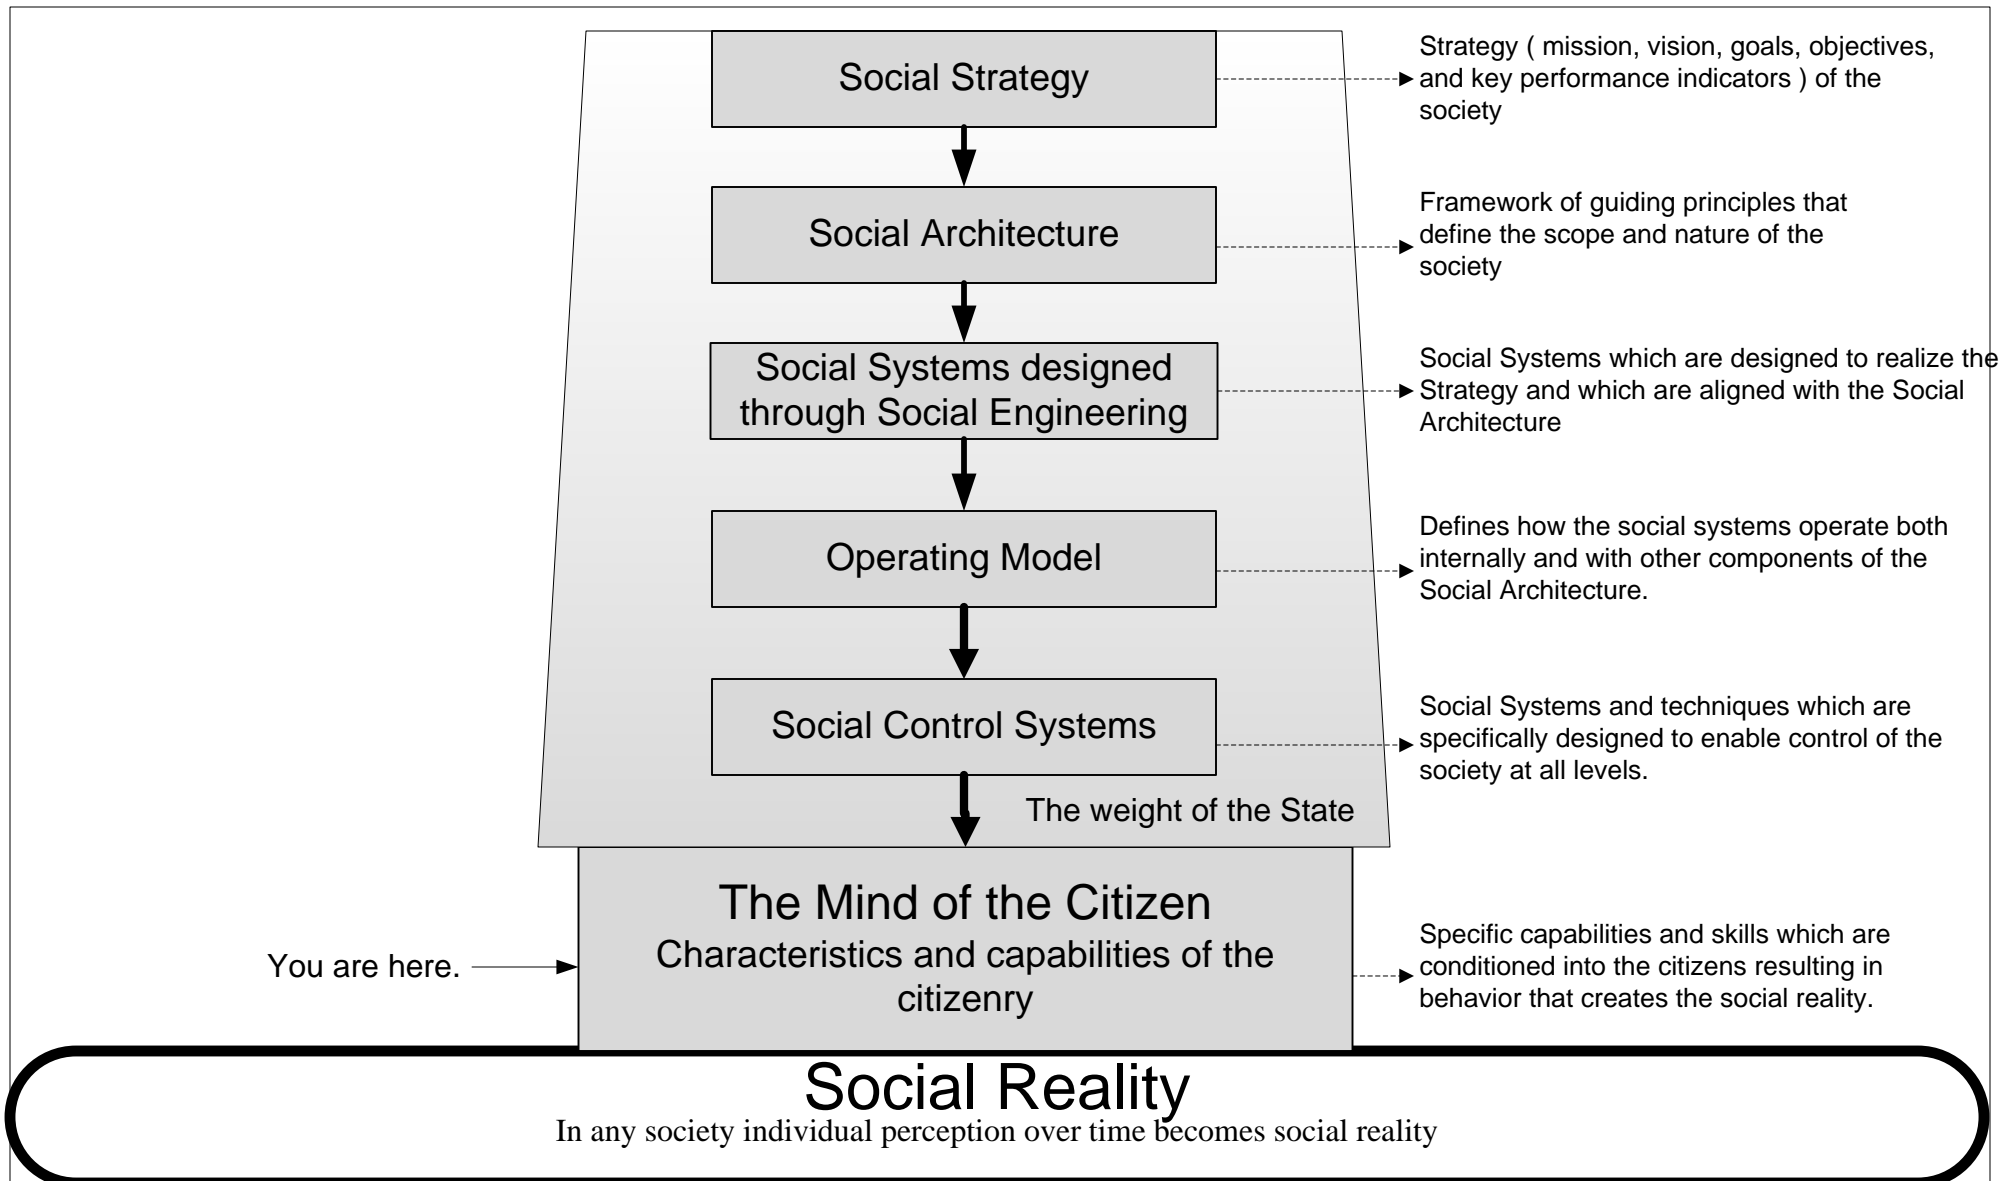

Social Reality
In any society individual perception over time becomes social reality

Foundational Concepts installed in the citizen's minds through cultural programming

| Hierarchy of authority in the social system | Personality Integration i.e "What I am" is defined in terms of the system | Institutional Awareness | Mythology of the Culture | Acknowledgement of position in the hierarchy of power of the system |

Social Context of an Oligarchic Controlled State

Why is this model depicted in Red? Because if you don't understand it then the social context is a cage.

The Oligarchy

Social Strategy — Strategy (mission, vision, goals, objectives, and key performance indicators) of the society

Social Architecture — Framework of guiding principles that define the scope and nature of the society

Social Systems designed through Social Engineering — Social Systems which are designed to realize the Strategy and which are aligned with the Social Architecture

Operating Model — Defines how the social systems operate both internally and with other components of the Social Architecture.

Social Control Systems — Social Systems and techniques which are specifically designed to enable control of the society at all levels.

The weight of the State

Notice that in this model **direct control** (a police state) of the population is not necessary. Control is exerted indirectly. Which is why the general population has great difficulty identifying their true state (enslavement) and the source of their enslavement (the Oligarchs).

Social participation by circumstantial conscription i.e. people are born into the system

You are here.

The Mind Cage
Characteristics and capabilities of the citizenry

Specific capabilities and skills which are conditioned into the citizens resulting in behavior that creates the social reality.

Social Reality
In any society individual perception over time becomes social reality

Foundational Concepts installed in the citizen's minds through cultural programming
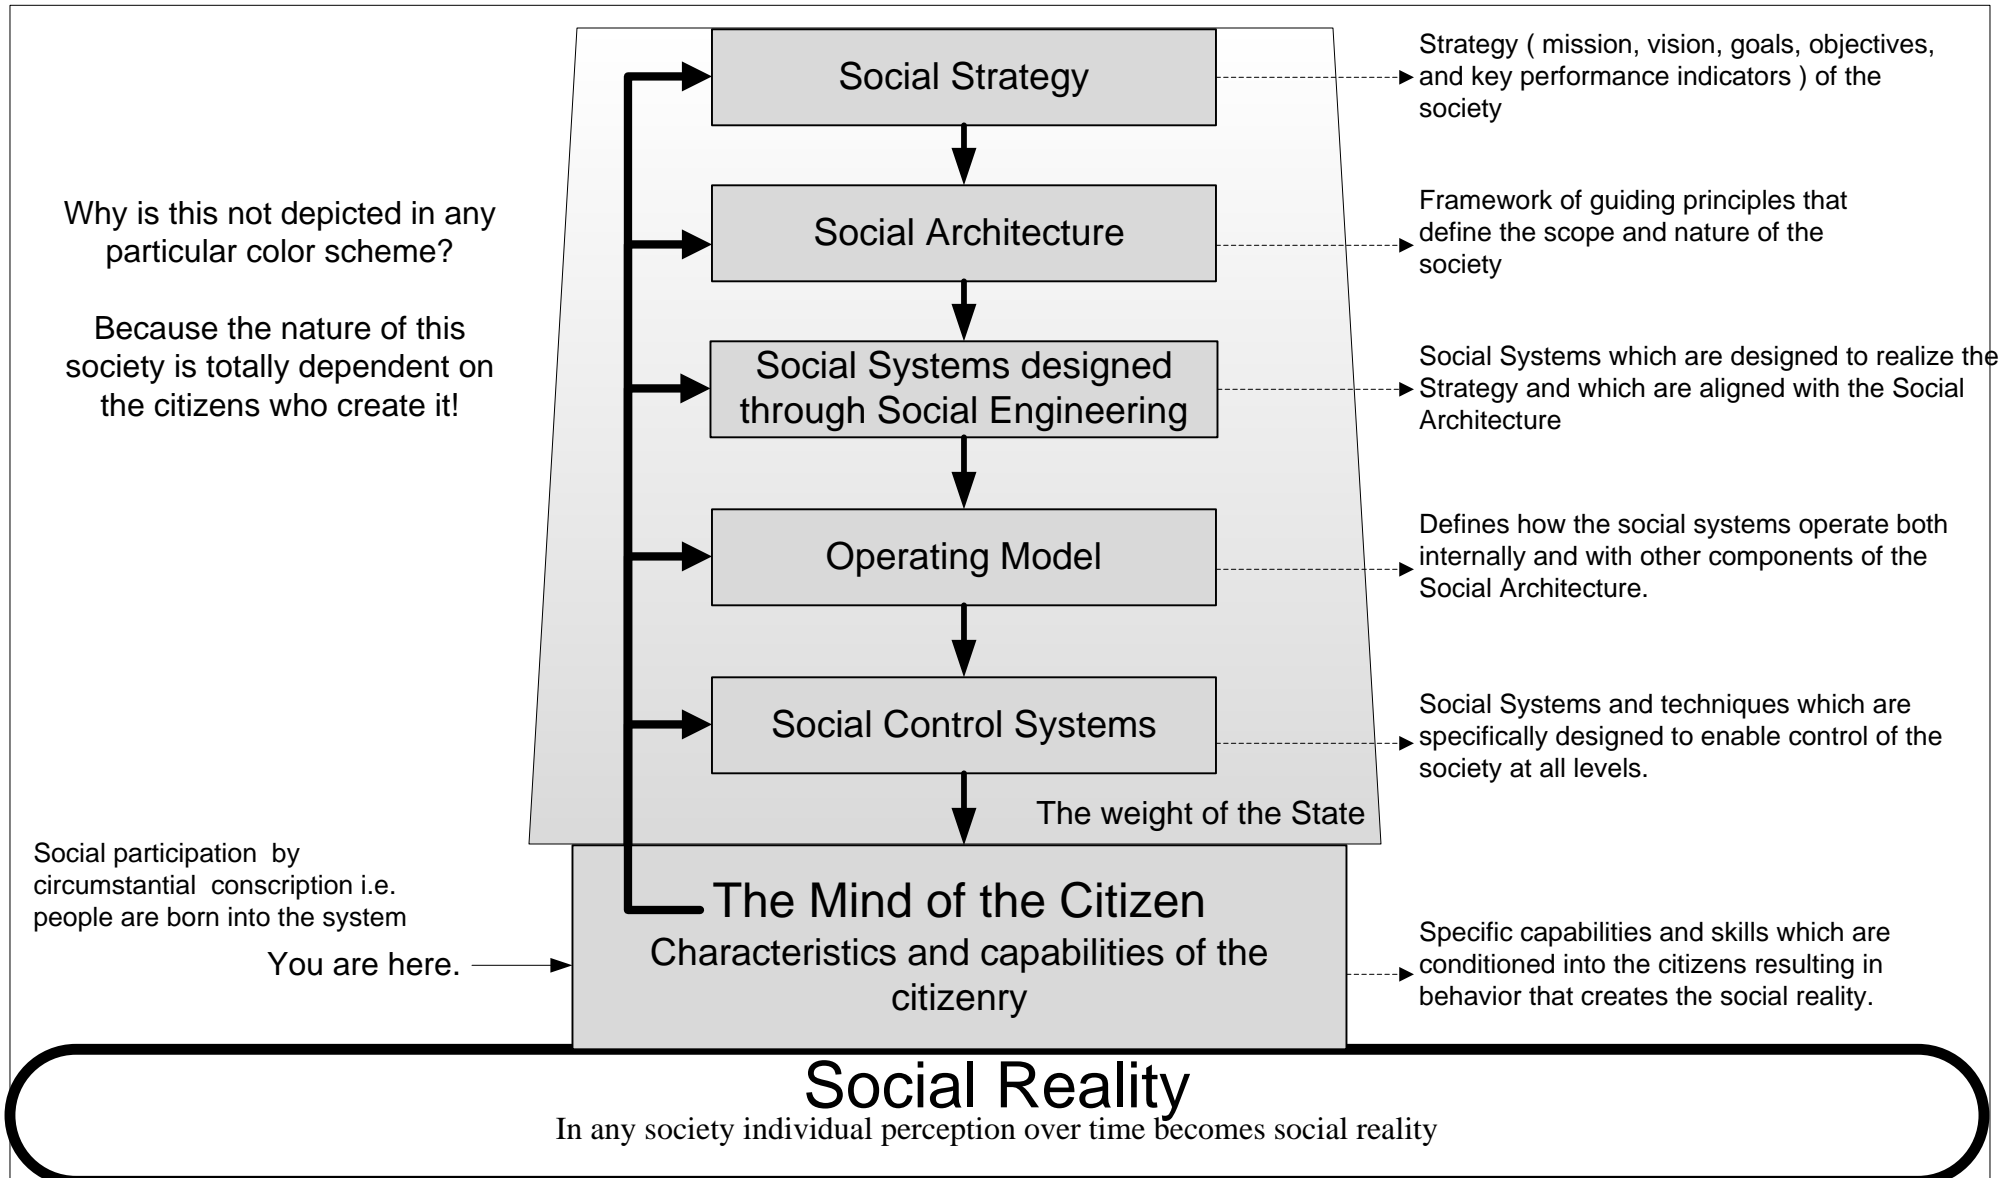

Hierarchy of authority in the social system

Personality Integration i.e "What I am" is defined in terms of the system

Institutional Awareness

Mythology of the Culture

Acknowledgement of position in the hierarchy of power of the system

Social Context of a Democratic State

Social Strategy — Strategy (mission, vision, goals, objectives, and key performance indicators) of the society

Social Architecture — Framework of guiding principles that define the scope and nature of the society

Social Systems designed through Social Engineering — Social Systems which are designed to realize the Strategy and which are aligned with the Social Architecture

Operating Model — Defines how the social systems operate both internally and with other components of the Social Architecture.

Social Control Systems — Social Systems and techniques which are specifically designed to enable control of the society at all levels.

The weight of the State

Why is this not depicted in any particular color scheme?

Because the nature of this society is totally dependent on the citizens who create it!

Social participation by circumstantial conscription i.e. people are born into the system

You are here.

The Mind of the Citizen
Characteristics and capabilities of the citizenry — Specific capabilities and skills which are conditioned into the citizens resulting in behavior that creates the social reality.

Social Reality
In any society individual perception over time becomes social reality

Foundational Concepts installed in the citizen's minds through cultural programming

Democracy

Self Awareness

Social Awareness

Clear understanding of the reality of the Culture

Acknowledgement of and commitment to personal responsibility to define, create, and maintain social reality.

Social Context of a State based on Strategic Social Architecture Principles
This shows where Strategic Social Architecture fits in the social context

Social Strategy — Strategy (mission, vision, goals, objectives, and key performance indicators) of the society

Strategic Social Architecture — Framework of guiding principles that define the scope and nature of the society

Social Systems designed through Social Engineering — Social Systems which are designed to realize the Strategy and which are aligned with the Social Architecture

Operating Model — Defines how the social systems operate both internally and with other components of the Social Architecture.

Social Control Systems — Social Systems and techniques which are specifically designed to enable control of the society at all levels.

Why is this depicted in the green color scheme?

Because the nature of this society is totally dependent on the citizens who create it!

Social participation by intention i.e. people voluntarily participate in the system

You are here.

The Mind of the Citizen
Characteristics and capabilities of the citizenry

Specific capabilities and skills which are conditioned into the citizens resulting in behavior that creates the social reality.

Social Reality
In any society individual perception over time becomes social reality

Foundational Concepts installed in the citizen's minds through cultural programming

| Democracy | Self Awareness | Social Architecture and Social Engineering | Social Awareness | Clear understanding of the reality of the Culture | Acknowledgement of and commitment to personal responsibility to define, create, and maintain social reality. |
