Table Systems

Adaptable lab furnishings have become an integral part of most lab layouts. Our table systems offer a great selection of products that provide a flexible, durable and affordable way to meet your needs, now and into the future.

Wire Shelving

Wire shelving storage solutions to fit needs in most any laboratory, cleanroom or storeroom. We offer stationary, mobile and high density shelving products to outfit your storage environment.

Green Epoxy Coated is great for wet or dry storage environments. Stainless Steel is suitable for clean room use. Shelving is provided with leveling feet. Numerically calibrated grooved posts, tapered plastic split sleeves and shelf collars combine to make shelving assembly simple.

Chemical Fume Hoods

Our chemical fume hoods feature a clean, bright interior, offering an expansive working space with a tall sight line and a seamless design that promotes airflow and visibility. The result is a safer and more comfortable working environment.

Available in standard or high-performance models, these hoods can be configured with epoxy or work tops and customizable services such as sinks, outlets, and lighting. These customizable options allow you to build a hood that suits your space and application.
