Fisherbrand™ Modular Cleanroom Catalog

Fisherbrand Modular Cleanroom Offering

Products and Services for Modular Cleanrooms & Accessories

Modular cleanrooms are a cleanroom made from prefabricated components. Modular cleanrooms can be as permanent as a cleanroom that's built with stud and drywall, they're easier and faster to build and are easily modified, reconfigured, and relocated.

The Fisher Scientific team offers:

- A quick delivery furniture program with complete labs shipping within 14 business days*
- An extensive inventory of high quality furnishings & components
- Clear and easy project communication

Services include:

- Design, project management and factory trained installation

Fisherbrand™ Lab Furniture designs modular cleanrooms that meet ISO standards for industries like pharma, aerospace, and electronics. These controlled environments filter out dust, microbes, and other particles to support clean manufacturing and research.

Modular cleanrooms are built off-site using prefabricated components, allowing for faster installation, lower costs, and minimal disruption. They can be installed in existing spaces without the need for new construction.

Easy to modify, expand, or relocate, modular cleanrooms offer long-term flexibility. When your needs change, your cleanroom can change with you.
