Two-sided Corner with Fireview

Three-sided Corner with Fireview

Four-sided Corner with Fireview

## Multi-sided Designs

Custom Firescreen Company excels in design and crafting of unique fireplace doors. Hours of careful planning and engineering are devoted to each firescreen. The result is a door that radiates a pleasing quality associated with harmony of form, color, excellence of craftsmanship, and originality. If you have a corner, bay, peninsula, or full circular fireplace, Custom Firescreen can enclose it with style and beauty. Our featured firescreen door (see front) is designed to provide an uninterrupted view of the fire. Custom Firescreen manufactures the only solid brass all glass corner door in the industry. Also, by adding such options as hidden venting, trimline framing, tinted glass, fireview or fullview bi-folds, you can create a smooth and graceful appearance that conveys a feeling of subtle sophistication.

## Metal Finishes:

Custom Corner glass enclosures, as well as all Custom Firescreen products, are produced from the highest quality materials available. Premium grade pure metals or plated steels provide durability, strength, and beauty. In addition, we offer a wide selection of metal finishes which include:

- Solid Polished Brass
- Solid Antique Brass
- Smoked Chrome
- Brushed Nickel
- Polished Chrome
- Brass Plated (Polished or Antique)
- Velvet Black
- Any Combination

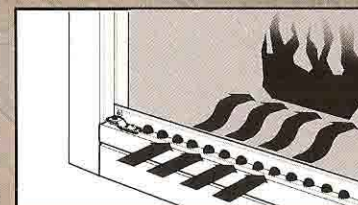

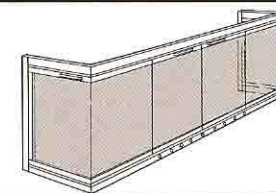

## Options:

In addition to our high quality glass enclosures, Custom Firescreen offers several unique options to further enhance the beauty and efficiency of the fireplace. These options include:

- Heavy Wire Mesh Curtains
- Fireview All Glass Look
- Bronze-3/16" Tempered Glass
- Smoked-3/16" Tempered Glass
- Foldback Bifold Doors
- Fullview
- Trimline Frame
- Visual or Hidden Draft Control
- Twin Doors
- All Glass Corner

### All Glass Corner (Optional)

This option displays the fire with an unobstructed view from all sides.

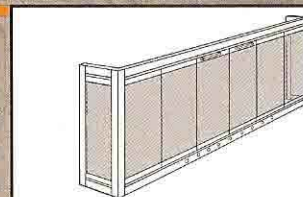

### Hidden Damper (Optional)

Air passage is under & over, yet airtight when the damper is closed. Controls remain obscured.

### Fixed Panels

Adding Custom Firescreen's Fixed Panels solves the problem of extremely wide fireplace openings, while augmenting the view of the fire.
