FreeState Flow Solutions, Inc. is pleased to represent S.P. Kinney Engineers, Inc., a 3rd Generation family owned American business. Kinney's been in business since 1941 and is headquartered in Carnegie, PA in the heart of the historic industrial manufacturing complex of Western Pennsylvania. Kinney's experience is long and extensive with over 10,000 installations of their equipment in critical industrial facilities domestically and internationally. You can find their products in Steel Mills, Power Generation Facilities, Water Plants, Wastewater Plants, and other process facilities that utilize raw water and need it to be strained prior to process utilization or environmental discharge.
