

AI AND AIOPS CAPABILITIES

We help IT organizations prepare for, and implement AI capabilities, from enhanced Enterprise Bing Search, CoPilot, ChatGPT, AI Automation, and AIOps.

CLOUD

We develop CCoEs and provide governance and standards for Cloud Migrations, moving applications and data centers to the cloud, identifying interdependencies, and migration wave planning. Cloud management and operations, AIOps, and DevSecOps integration.

IT STRATEGY, VISION, ROADMAPS

We develop Digital Transformation capabilities, aligned with strategies that enable businesses in new and innovative ways, leveraging the latest technologies and aligning organizations to transform and automate, bringing new services to market faster and growing their customer base.

PMO ASSESSMENTS

We assess, implement, and develop efficient, agile PMOs that standardize programs, and quickly implement organization strategies and digital transformation initiatives.

IT OPERATIONS & MANAGEMENT

95% of all organizations are reactive. We help organizations become proactive and preemptive, becoming extremely efficient and significantly reducing IT operating costs.

M&A IT Integration

We are experienced in small and large global IT M&A programs, from pre-deal due diligence to full integration, e.g. infrastructures, data centers, systems, applications, data, and operations. We align IT and business goals, bringing significant value and cost optimization to the new organization.

Strategic CIO Level Services

We partner with you to create and execute IT strategies that reduce costs, enhance security, improve reliability, and let you focus on your core business. Our experience spans small businesses, global Fortune 100 companies, and federal agencies enabling us to deliver industry-leading IT services.

Our consulting services include workshops and assessments in the following areas:

- **AI and AIOps** — We help organizations implement AI strategically, launching new services and automating existing ones in innovative ways. We guide teams in instrumenting applications so AIOps tools can assess performance and boost operational efficiency.
- **Cloud** — We establish Cloud Centers of Excellence to define governance and standards. Our cloud migration services include full application identification, rationalization, dependency mapping, and wave planning. We also support cloud operations, AIOps planning, and DevSecOps integration to ensure secure, scalable environments.
- **IT Strategy, Vision & Roadmaps** — Clear strategies and goals are essential for effective digital transformation. We help organizations define and execute roadmaps that keep pace with today's rapid development cycles—where services that once took years now launch in months.
- **PMO Assessment & Development** — We've assessed some of the world's largest PMOs, helping them align portfolios, programs, and projects for maximum efficiency. Our approach enables organizations to identify what matters, measure performance, and make fast, informed decisions such as which initiatives to prioritize or cancel.
- **IT Operations & Management** — Most IT organizations operate reactively. We help shift to proactive and even preemptive models, resolving issues and deploying solutions automatically. We assist in AIOps strategies and leveraging the latest AIOps tools. Our clients often see IT operating cost reductions of 20% to 50%.
- **Mergers & Acquisitions (M&A) IT Integration** — We are experts in M&A, from pre-deal IT due diligence to post-merger integration. Our assessments uncover overlaps, risks, and cost-saving opportunities. We design integration strategies that align with business goals, accelerate synergy realization, and minimize disruption. Whether acquiring a startup or merging with a global enterprise, we ensure seamless infrastructure, applications, and operations unification.
