2026 Mid-Year Updates

Dear Vis-CAT Community,

What a season it has been. Since our last update, our community has grown and we couldn't be more grateful to welcome every new subscriber alongside our founding members. You're part of something that truly matters getting the right tools to the right children, before it's too late. We have a lot to share. Let's dive in!

ACBO Connect Conference in Brisbane June 2026

Our partnership with the Australasian College of Behavioural Optometrists (ACBO), was launched at their Connect conference this June, where Christine received the Keith Woodland Award for outstanding contribution to behavioural vision care. Recognition from peers in the field means everything. It signals that what we're building isn't just innovative; it's grounded in expertise and commitment to the children we serve. The ACBO partnership connects us with practitioners across the region who already trust this kind of rigour.

It's Working in Practice

Recently, we spent time with the team at Bayside Eyecare as they began introducing Vis-CAT into their everyday care pathway. Ally, Audrey, and Rebecca are exactly the kind of practitioners we're building this for, committed to their young patients, willing to look deeper, and eager to identify barriers to learning that standard tests miss. Visual processing difficulties often hide in plain sight. A child passes the standard eye test yet continues to struggle quietly. Identifying these challenges earlier can change everything

Growing Beyond Borders

Our recent trip to Palm Beach, Florida, opened doors we didn't expect. We connected with clinicians, shared our mission at the Bright Minds Processing "Shining a Light" Annual Benefit, and had the privilege of working alongside former NBA star Dwayne McClain and Sound Scouts CEO Carolyn Mee, all of whom champion the same cause: making sensory processing awareness a priority for children everywhere. With media coverage from CBS12 in Palm Beach and international partnerships forming, the conversation about visual processing is finally happening.

Partnership Changes Scale

Behind the scenes, we've locked in major institutional commitments that will bring Vis-CAT to hundreds of schools and practices across Australia. The recognition is moving beyond early adopters to systemic integration.

What's Next

The momentum is real. If you have been curious about how Vis-CAT works or how it might fit into your practice, reach out.

Get Involved

Are you a teacher, school leader, psychologist, optometrist, or researcher? We'd love to hear from you
