## BUILDING A STRONGER GRAYSON COUNTY **TOGETHER**

Black Mountain Cement (“BMC”) is working to build a state-of-the-art industrial facility that will serve as a modern cornerstone of cement production technology, positioning North Texas as a leader in critical building products supply infrastructure.

**CREATE  
HUNDREDS  
OF JOBS**

**MILLIONS  
IN TAX  
DOLLARS**

**CRITICAL  
INFRASTRUCTURE  
UPGRADES**

### **Positioning Grayson County as a Leader in Critical Building Products Supply Infrastructure**

North Dallas’ **growing cement supply gap** has likely inhibited companies, including the leading tech companies that the region wants to attract, from expanding into the area. Black Mountain Cement’s facility will:

- Address Future Supply Gap for High Quality, Sustainable Cement in North Texas
- Position Grayson County as a Desired Area for Business
- Decrease Supply Risk
- Lessen Freight Costs
- Shorten Transport Times

### **EXPERIENCED LEADERSHIP**

HR Group, which oversees the BMC project, brings extensive experience building, owning, and operating critical construction infrastructure across the state, covering materials from sand to lumber, and which also owns numerous energy infrastructure facilities.

### **ABOUT HR GROUP**

HR Group, guided by a long-term vision, has the ability to directly operate its assets and is passionate about positively contributing to the communities where it operates.
