Foreword

From a Dream to a Powerhouse

In 1971, the late Mr. Wasmī Al-Khaleeb envisioned building a large-scale pipeline construction company in Saudi Arabia. He established the organization starting with civil works, gradually growing into a large-scale civil contractor with heavy earth-moving equipment, drum trucks, diesel and petrol tankers, water tankers, trailers, and light vehicles — and a workforce of around 400 Saudi and non-Saudi employees.

To fulfill his father's dream, Bandar Wasmī Al-Khaleeb developed the **CAT International** with a well-experienced pipeline construction team of around **600 employees**. CAT is registered with Saudi Aramco under **Vendor No. 10059122**, with full facilities, manpower, machinery, tools, and financial capacity to execute pipeline construction across Civil, Mechanical, E&I, Power, Energy, and Communication works — including cross-country pipelines, oil/water/gas well sites, and flow lines.

Foreword

Growing Stronger with Trans Asia

New Partnership

An additional international partner, **Trans Asia**, has joined CAT to strengthen its capabilities in the pipeline business. Trans Asia brings specialized tools and machinery for:

- Valve testing, torquing, and tightening
- De-cruding and pipeline hydro-testing
- Chemical cleaning and nitrogen purging

CAT's Core Ambition

CAT's ambition is to accomplish successful pipeline construction projects with **100% performance in Safety and Quality**, within budget and on schedule. The company combines decades of founder vision with modern execution capabilities, making it one of the most capable petroleum services contractors in the Kingdom of Saudi Arabia.

- ✔ Saudi Aramco Vendor No. 10059122 — a mark of trust and compliance with the Kingdom's most demanding oil & gas standards.

Line of Business

Civil Works

CAT's Civil Works division covers the full spectrum of ground-level construction activities required for oil & gas and infrastructure projects:

Earthworks

Excavation and backfilling, site preparations, and construction of right-of-way corridors

Structural

All types of concrete foundations, structural fabrication and erection, security fencing installations, and pre-fabricated structural buildings

Infrastructure

Construction of building facilities, warehouses, roads, bridges, and asphalt laying

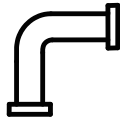

Line of Business

Mechanical Works

Welding

All manual, semi-automatic, and automatic welding processes, including pipe fabrications and installations to the highest industry standards.

Pipeline Construction

Cross-country pipeline and well site construction, pigging, in-process inspection, and hydrotesting for oil, water, and gas systems.

Valve Works

Valve testing and valve installations, including torqueing, tightening, and de-cruding operations in partnership with Trans Asia.

Line of Business

Electrical, Instrumentation & Communication Works

E & I Works

- Construction of sub-stations and overhead power lines (13.5 KV to 34.5 KV)
- Installation of electrical transformers, switch racks, and switchgears
- Above and below ground low voltage power and control cables
- Testing, pre-commissioning, and instrument installation
- Intrusive (PT and PDT) and non-intrusive (MT) sensors for Leak Detection System (LDS) and Corrosion Monitoring System (CMS)

Cathodic Protection

- Vertical anode and deep anode up to 120 meter depth
- Magnesium anode, 3-test pin station, and one pin test station
- Terminal and bonding junction box installations

Communication Works

- Installation of Fiber Optic Cables (FOC) and communication copper cables
- Splicing and testing of fiber optic systems
- Installation of different types of communication equipment
- Pre-commissioning and system configuration
- RTU and communication tower installations

CAT's E&I and Communication capabilities cover the full project lifecycle — from installation through testing, pre-commissioning, and system configuration.

Electrical & Communications Supply

Electrical & Communications Supply

Electrical Cables

Supply of all types of power, control, low voltage, and medium voltage cables

Towers

Supply of communication towers, lighting poles, and structural towers

Control Panels

Supply of electrical control panels, distribution systems, and switchgear

Communications

Supply of communication equipment, cables, and fiber optic systems

Lighting

Supply of industrial and outdoor lighting units and illumination systems

Supply services cover the needs of electrical and communications projects — from core materials to operational equipment and infrastructure.

Heavy Equipment Rental & Sales

Rental and Sale of Heavy Equipment, Welding Machines & Generators

Heavy Equipment

Rental and sale of heavy construction equipment including bulldozers, excavators, cranes, and earthmoving machinery

Welding Machines

Rental and sale of all types of welding machines — manual, semi-automatic, and automatic welding equipment

Electric Generators

Rental and sale of electric generators of various capacities for construction sites and industrial projects

 CAT provides flexible rental and direct sale options for heavy equipment, welding machines, and generators to support projects of all scales across Saudi Arabia.

Construction & Infrastructure

Residential Complexes, Buildings, Finishing, Roads & Infrastructure

Residential Complexes

Design and construction of residential compounds, housing units, and multi-story residential buildings

Buildings & Structures

Construction of commercial, industrial, and administrative buildings to the highest engineering standards

Finishing Works

Complete interior and exterior finishing including tiling, plastering, painting, ceilings, and fit-out works

Roads & Paving

Construction and maintenance of roads, asphalt paving, curbs, and traffic infrastructure

Infrastructure

Construction of water networks, drainage systems, stormwater, and underground utility infrastructure

CAT delivers integrated construction solutions — from residential complexes and commercial buildings to roads and full infrastructure development across Saudi Arabia.

Organization

Company Organization Chart

CAT's organizational structure is led by a General Manager and Operations Manager, branching into Construction, QA/QC, Safety, Planning & Unit Control, Pre-Casting, and Administration departments — ensuring clear accountability across all project functions.

Planning & Scheduling

Project Management with Primavera

CAT uses the latest Primavera software for project planning, scheduling, and cost control. The team has expertise dating back to Primavera P3 in 1994, with mastery of all features in the latest versions.

CAT's planning team excels in optimizing project activities using **PERT-CPM methodology** and resource loading — ensuring projects are delivered on time and within budget through rigorous schedule management.

Quality

Quality Management System

Our QA/QC Team

CAT's Quality Department is fully updated on international quality requirements of the **ISO 9001 series**. QA and QC Managers are certified quality lead auditors with more than **20 years of experience** in Saudi Aramco projects. QC Inspectors across all disciplines have a minimum of **5 years of field experience**.

Areas of QC Expertise

- Cross-country pipeline projects
- Electrical and instrumentation systems
- Battery systems and solar panels
- Cathodic protection, LDS & CMS
- Fiber optic cable installations
- RTU and system configurations
- All types of testing and pre-commissioning

Quality Certification

ISO 9001:2008 Certificate of Registration

This certificate confirms that the Quality Management System of **CAT International Company**, located in Al Ahsa, Oyuon, Saudi Arabia, has been assessed and approved by **IQS UK Standards Audits Division** in accordance with **ISO 9001:2008**.

Registered Scope

General Contractor for Oil & Gas, Mechanical Works, Welding and Pipeline Works, Horizontal Directional Drilling, Electrical & Communication Works, Installation of Electrical and Communication Towers, Excavation and Backfill, Construction of Roads and Highways, Asphalt Laying, Maintenance for Industrial Buildings, Hospitals and Medical Complexes, HVAC, Oil and Gas Services, Light and Heavy Equipment Rentals.

Certificate Date

20th October 2025

Expiry Date

19th October 2026

Registration No.

KSA450450

Accredited under ASCB — listed in the International Register of Quality Assessed Organisations. Verify at www.iqsuk.com/certificate-authenticity using Registration No. KSA450450.

Safety

Health, Safety & Environment Policy

It is the policy of CAT that all operations shall be carried out with the greatest regard for the **health and safety of all workers** and project sites. CAT firmly believes that safety and efficient project execution must go hand-in-hand.

Safety Program Manual

CAT's Safety Department has developed a comprehensive health and safety program manual based on international safety standards and client-specific requirements.

Dedicated Safety Staff

Safety Managers, Safety Supervisors, Safety Officers, Male Nurses, First Aiders, and Fire Watch personnel are deployed across all project sites.

Zero Compromise

CAT's ambition is 100% safety performance on every project — no exceptions, no shortcuts, and full compliance with Saudi Aramco and international HSE standards.

On-Going Projects

Project 1: TIE-IN HWYH-547 Oil Well to HWYH GOSP-2

Client / Subcontract

Saudi Kad

Location

Hawiyah, KSA

End Client

Saudi Aramco

Scope of Work

- Construct **4.5 KM of 10" diameter CS Test Line**, externally and internally FBE coated
- 62 existing crossings to be managed
- Construction of 3 header lines
- Cathodic Protection installation for Saudi Aramco

On-Going Projects

Project 2: KHAFJI/TANAJIB Pipeline — Contract No. 6600036119

Client / Subcontract

Al Robaya Holding Company

Location

Safaniyah, KSA

End Client

Saudi Aramco

Scope of Work — Mechanical & Civil

- Blasting and Stopaq application on girth welds
- Excavating the line in sandy area and trenching
- Holiday testing, lowering, backfilling, and berming
- Stabilization by marl and welding activities

On-Going Projects

Project 3: Overhead Power Line & Cathodic Protection — Khurais

Client / Subcontract

Bin Qurayah Holding Co.

Location

Khurais, KSA

End Client

Saudi Aramco

Scope of Work

Construction of **Overhead Power Line and Cathodic Protection** for **eight (8) wellsites** in the Khurais area for Saudi Aramco. This project demonstrates CAT's integrated capability in both electrical infrastructure and corrosion protection systems for oil well facilities.

On-Going Projects

Project 4: ON-SHORE Maintain Potential Projects Zone SA-2 — Contract No. 6600038864

Client / Subcontract

Al Robaya Holding Company

Location

Haradh, KSA

End Client

Saudi Aramco

Scope of Work — Full Multi-Discipline

- Civil, Mechanical, Electrical & Instrumentation (E&I) works
- **13.5 KV Overhead Power Line** (5 Kilometers)
- Cathodic Protection installation
- Communication works
- Scope covers **five (5) gas wells** and their flowlines

On-Going Projects

Project 5: 13.5 KV Overhead Power Line & Cathodic Protection — Contract No. 11282016

Client / Subcontract

CAT Company

Location

Aindar and Shedgum Area, KSA

End Client

Saudi Aramco

Scope of Work

Installation of **13.5 KV Overhead Power Line** and **Cathodic Protection** systems for a Saudi Aramco project in the Aindar and Shedgum area. This project further demonstrates CAT's consistent delivery of high-voltage electrical and corrosion protection infrastructure across multiple Saudi Aramco zones.

On-Going Projects

Project 5: wonder winter land Riyadh — Contract No. 21289110

Client / Subcontract

CAT Company

Location

Riyadh Area, KSA

End Client

Sela Sport

Scope of Work

Installation and maintenance of amusement park rides and supply of spare parts.

On-Going Projects

Project 5: Boulevard City: Riyadh — Contract No. 21790309

Client / Subcontract

CAT Company

Location

Riyadh Area, KSA

End Client

Sela Sport

Scope of Work

Supply of electrical cables, control panels, lighting, construction equipment, steel, heavy equipment, electric generators, forklifts, refrigerators, and screens

On-Going Projects

Project 5: Qidiyah Six Falaq Project — Contract No. 117280016

Client / Subcontract

CAT Company

Location

AQidiyah Area, KSA

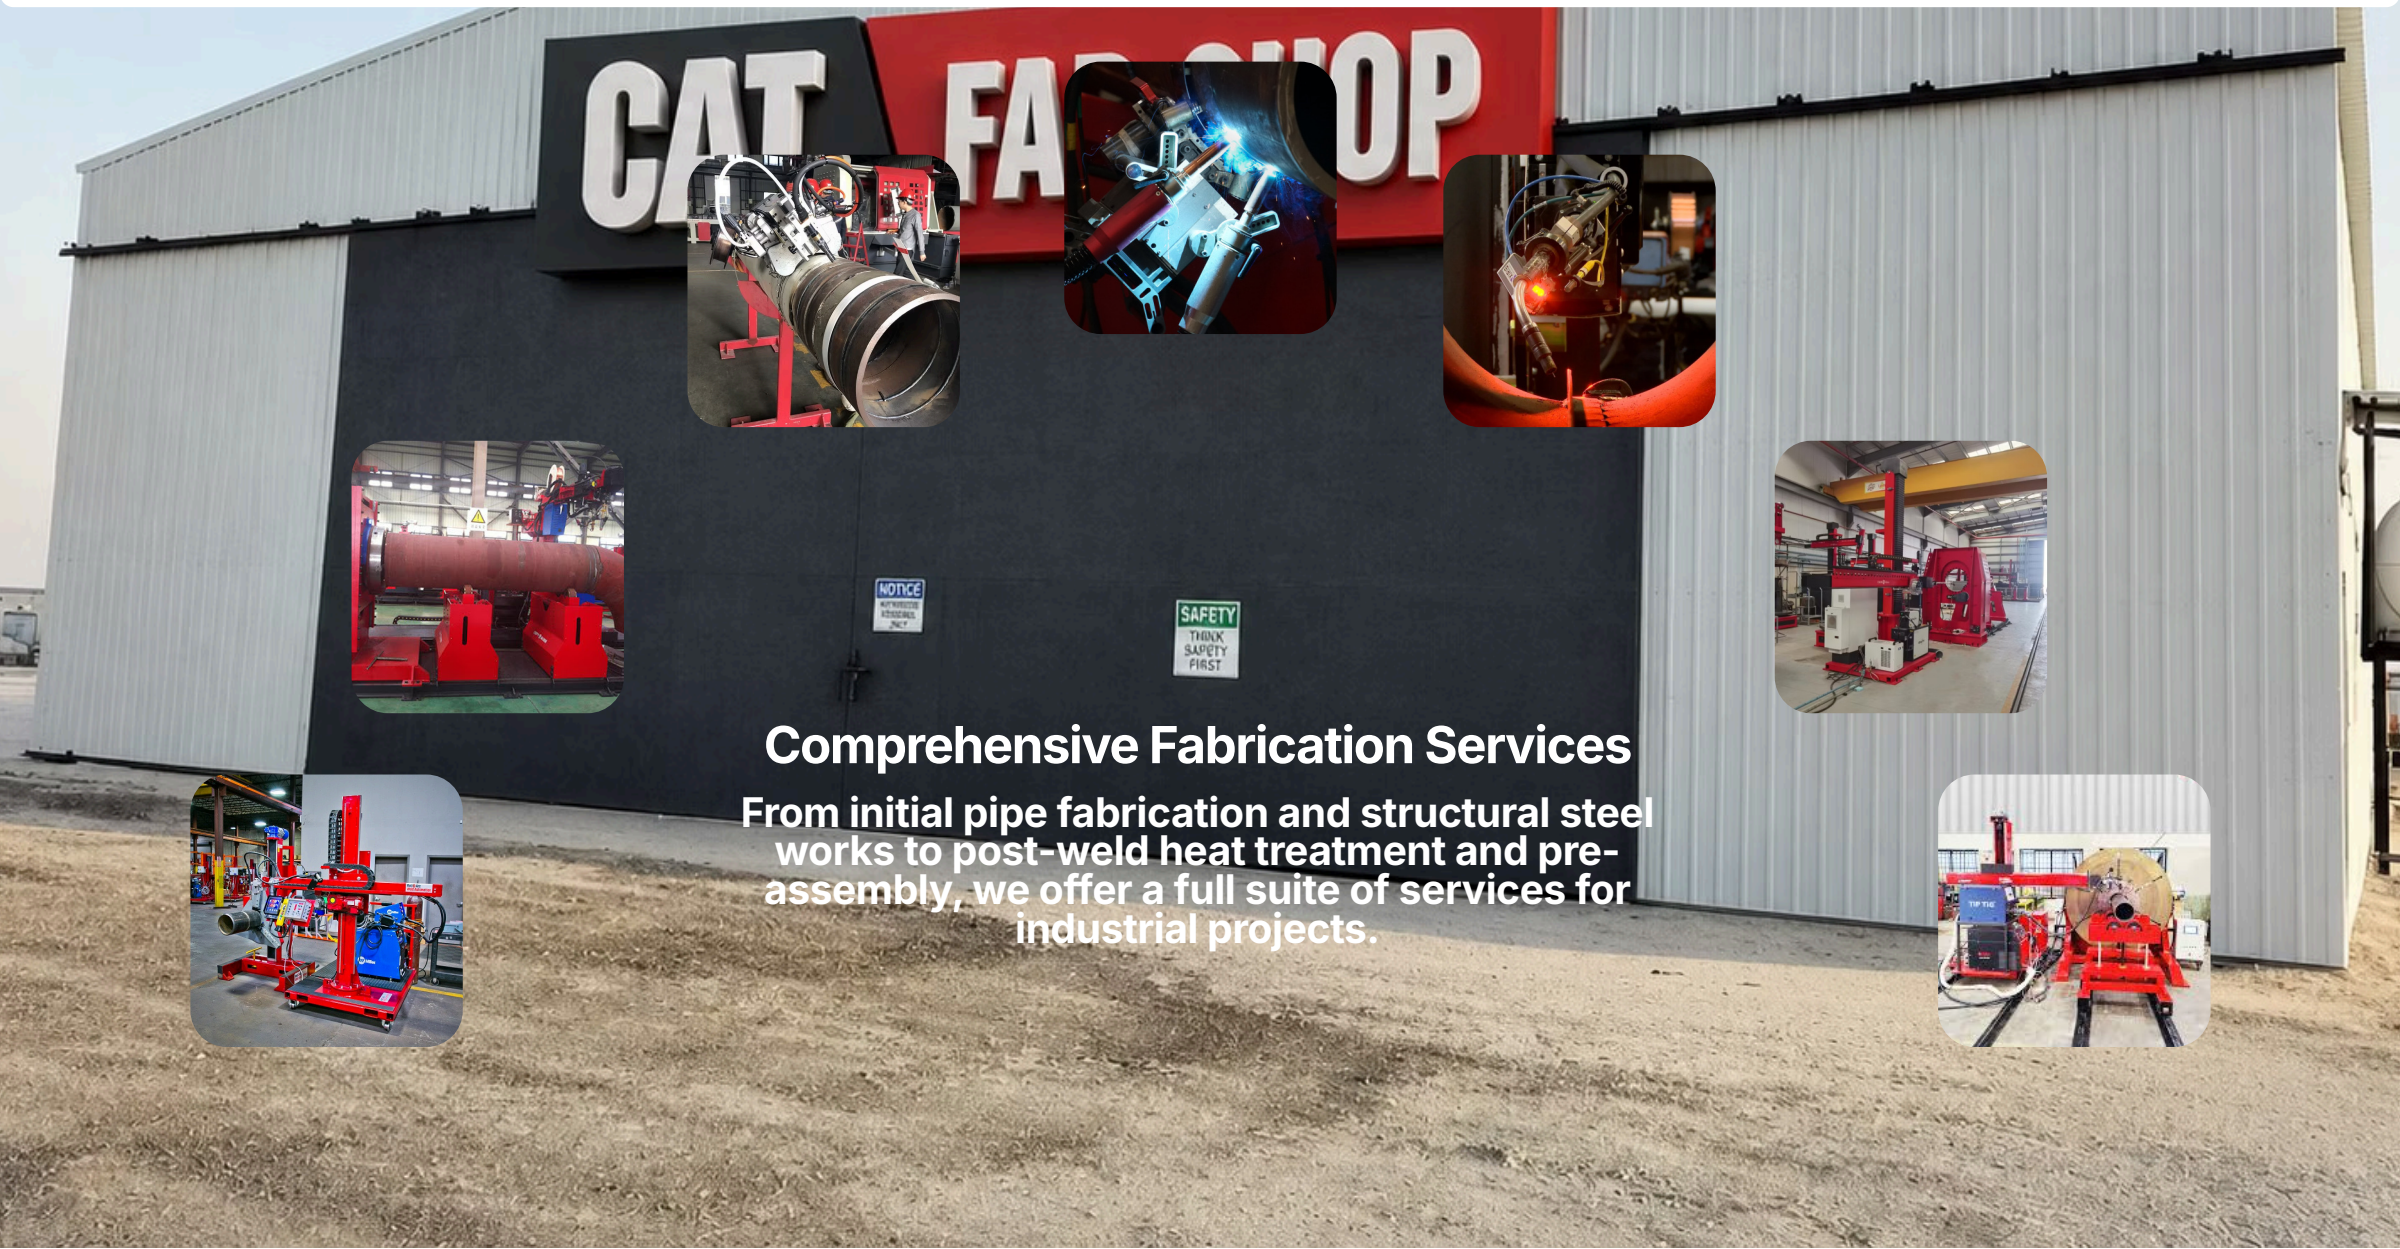

End Client

SauAl-Saif Company & Elite Company

Scope of Work

Excavation of 13 million cubic meters for Six Flags and backfilling and Excavation the pool.

CAT Fabrication Shop

Comprehensive Fabrication Services

From initial pipe fabrication and structural steel works to post-weld heat treatment and pre-assembly, we offer a full suite of services for industrial projects.

Facilities

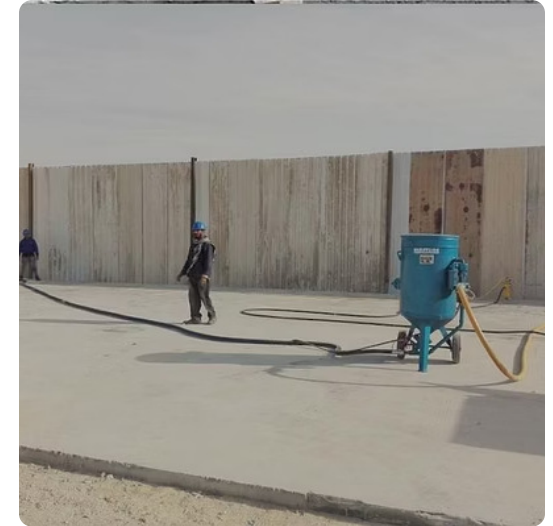

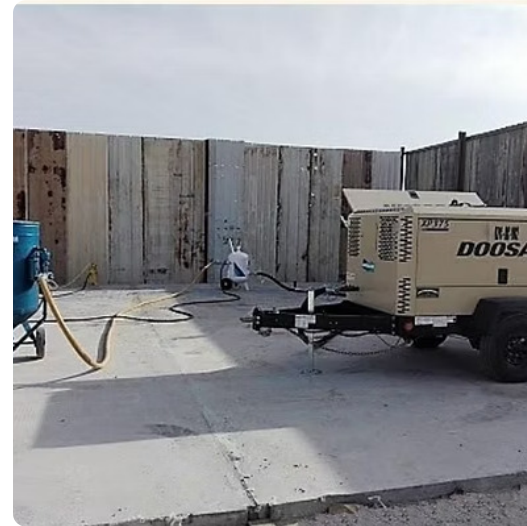

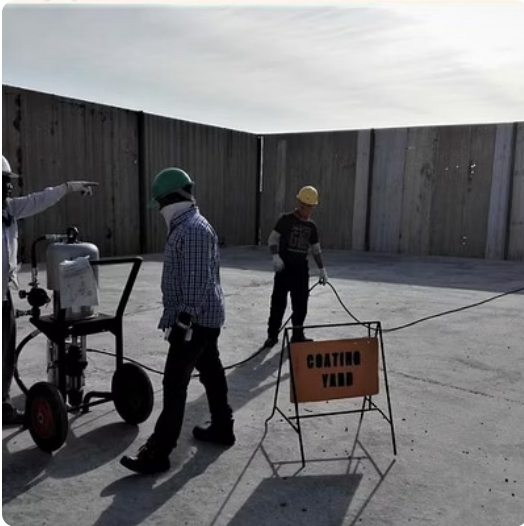

Rebar Cutting / Bending & Concrete Pre-Casting Areas

CAT's yard includes a dedicated **Rebar Cutting & Bending Area** equipped with industrial-grade machinery, and a large **Concrete Pre-Casting Area** with a designated curing zone — enabling in-house production of concrete components for civil works.

Facilities

Coating Area & Sandblasting Area

CAT operates a dedicated **Coating Yard** for pipe and structural coating activities, and a **Sandblasting Area** equipped with DOOSAN portable air compressors and sandblasting pots — ensuring proper surface preparation before coating application.

Activities

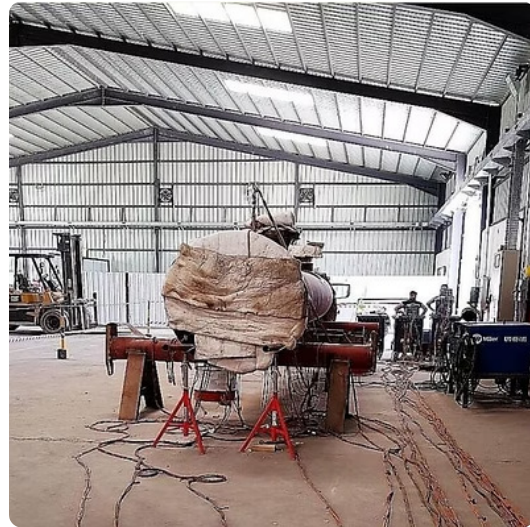

Piping Fabrication at CAT Fab Shop

CAT's Fab Shop is a hive of precision welding and pipe fabrication activity. Skilled welders in full PPE work on large-diameter pipe flanges and assemblies, with supervisors overseeing quality at every stage of the fabrication process.

Activities

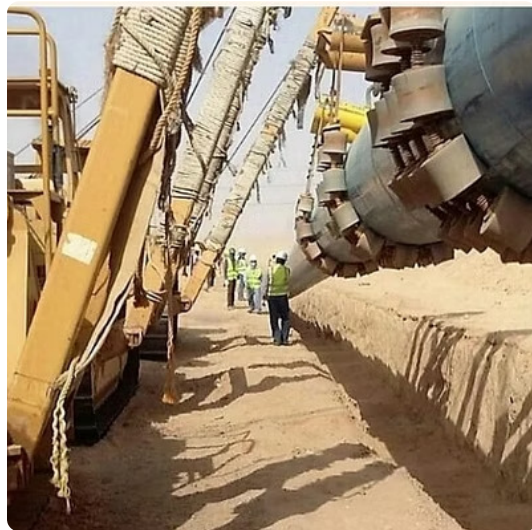

PWHT, Structural Fabrication & Anchor Construction

Post Weld Heat Treatment (PWHT) is performed using SCADA-controlled power units and insulation blankets on large cylindrical components. CAT also constructs heavy concrete anchors with dense rebar cages in desert environments for pipeline stabilization.

Activities

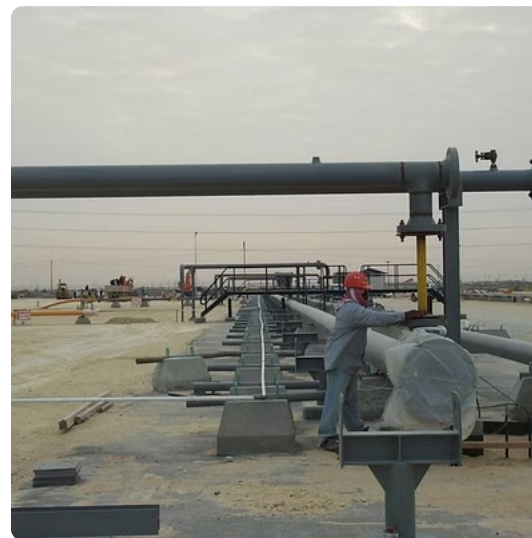

Cross-Country Pipeline Construction

CAT executes full cross-country pipeline construction — from trench excavation and pipe lowering using multiple sideboom cranes, to field welding under protective tents and holiday testing. Workers in high-visibility gear monitor every stage of the lowering and welding operations.

Activities

Pipeline Lowering, Holiday Testing & Oil Well Construction

CAT's field teams manage the complete pipeline lowering sequence — including crane-assisted lowering of pipes marked up to 17,500 KG — as well as the construction of oil well piping networks with complex structural supports in challenging desert terrain.

Location Map**CAT Location — Al Oyon, Al-Ahsa, Saudi Arabia**

Al Oyon is located in the Al-Ahsa province of Eastern Saudi Arabia, in proximity to Dammam, Al Khobar, and the major Saudi Aramco operational zones.

CAT's offices and yard are located on Al-Uqair Road, Al Oyon — easily accessible and strategically positioned to serve Saudi Aramco project sites across the Eastern Province.
