

ARE YOU LOOKING TO JOIN A DEDICATED WILDLIFE GROUP PROTECTING ENVIRONMENT AND WILDLIFE?

Wildlife Disaster Rescue and Recovery are a rescue and rehabilitation group for wildlife throughout the Darling Downs and neighbouring regions. We have dedicated volunteers who get to do a variety of different activities.

Do you enjoy making a difference?

- During disasters we assist with drop points, rescues and response to agency requests.
- After a disaster we conduct blackwalks, property inspections, habitat installation including nest boxes and small native plantings.

We operate during and after disasters, assisting the community and responding agencies with environmental and wildlife resources. We are a dedicated group of wildlife rescuers and rehabilitators.

Have you found wildlife in need of help. You can contact us for rescue or advice on #0402 307 988.

If you have found baby birds and can still see the parents, try re-uniting by placing in a branch off the ground, close to where the parents are. Stand back and observe the parents come down to the chick. If you can see an injury, do not re-unite, call for advice.

All wildlife when found benefit from being kept warm, dark and quite. After this, reach out to us and we can give further advice. If you have a local vet you can take injured animals to, this would be best outcome and quickest for the injured wildlife.

Any orphaned wildlife will need immediate care, contact us for further advice or visit our website for helpful information - this QR code will take you straight to our helpful page about what to do when you have found wildlife.

Follow us on Facebook for helpful advice. Search Wildlife Disaster Rescue and Recovery Inc or scan the QR code

Want to find out more?
You can visit us at our website www.wdr.org.au or scan the QR code to find out about volunteering or becoming a wildlife rehabilitator.

Email - enquiries@wdr.org.au
To join WDRR, our membership form can be found on our website under the 'Volunteering' tab
