WHAT WE DO

- Provide a drop off point in times of disasters at evacuations centres for Wildlife
- Conduct property inspections for impacted Wildlife after an event.
- Partner with other groups to conduct recovery works such as plantings and nest box installations
- Establish a base of operations in field for lead agencies
- Work with local government and agencies to provide a conduit for better Wildlife and environmental outcomes.
- We then arrange for animals to be assessed by a vet or at the Wildlife Hospital.
- We collect data on deceased animals to calculate the impacts.
