

MaineCoonections

Feeding Instructions

Our favorite foods are the Fancy Feast Poultry/Beef classic pates or Gravy Lovers variety packs. I feed a ½ to 1 can of wet in the AM and PM and always keep their bowl full of dry food. Our babies have graduated from the Royal Canin Mother Baby dry food to the Royal Canin Kitten. We also offer Royal Canin Maine Coon Kitten and ProPlan Kitten.

My adult cats absolutely love the Royal Canin Maine Coon breed specific brand. I mix that with the ProPlan. We supplement our food with NuVet Plus Feline Powder to ensure proper nutrients and vitamins to bolster their immune system and overall health.

For cat litter, I use the Tidy Cat unscented. Its dust free and scent free. No perfumes!!!! Stay away from covered litter boxes. These will be large cats and they won't have the room they need in a covered litter box.

We love using www.Chewy.com for auto shipping and home delivery! (I'm pretty sure the FedEx guy hates me on delivery day...)

Always keep fresh water available! This can be a challenge with your Maine Coon – they love water and love to play in it, splash in it and put their toys in it....They all have a funny digging ritual before drinking. We keep a full water bowl right in the shower and bath tub. They can play in it – and you won't have to mop anything up. Be sure to keep your toilet lids shut while they are little.
