

Wellness Schedule for Our Kittens

Our recommendations for Exams, Vaccinations, Diagnostic Test and More

6-9 weeks

- Physical Exam and First Vet visit!!!
- FVRCP (feline viral rhinotracheitis, calicivirus and panleukopenia) Vaccine #1 _____
- Dewormer (We are a closed cattery and all our adults have tested negative. We do not treat if not indicated).
- Feline Leukemia/FIV test (We are a closed cattery and all our adults have tested negative). We do not routinely test our kittens once our adults test negative for this.

10-12 weeks

- Microchip (completed in our cattery. You will be responsible to register the microchip with your personal information) Follow the instruction pamphlet in your homing packet to complete this.
- Check up and physical exam and verification of Microchip _____
- FVRCP (feline viral rhinotracheitis, calicivirus and panleukopenia) Vaccine #2 _____
- Rabies (only if required prior to shipping at this time. See next section) _____
- Travel to your home at 12 weeks: _____

13-16 weeks – At home with you at last!!!

Here is Your To Do List:

- Physical exam – well baby check with your vet – per purchase agreement for health guarantee
- Fecal Test (Take a stool sample with you to your well baby check. Just scoop a fresh one out of the box and put in a zip lock).
- Deworming (we only recommend if there is a positive stool sample. Do not treat your kitten unnecessarily).
- Rabies (if not done before shipping).
- Feline Leukemia test and possible vaccination- Our kittens are from negative indoor only parents and are sold as indoor only. However, if your kitten has been shipped, I cannot control what they are exposed to during transport. Testing is up to you. This vaccine may be unnecessary. You and your doctor should discuss and decide together based on your environment.

6-10 months

- Pre-surgical bloodwork as required by your doctor
- Spay – no later than 6 months – per contract _____
- Neuter – no later than 10 months – per contract _____
- Send proof of alteration from your vet to April@mainecoconnections.com to comply with our purchase agreement .

1 year

- Physical Exam / Wellness Screen
- FVRCP annual
- Rabies booster

Other

- Flea and Tick Prevention – not usually necessary with an indoor only pet – This may depend on your environment and other pets in your home that may have outdoor access. Please discuss with your Doctor

Your kitten is one-of-a-kind. Vaccines and tests are recommended based on your kitten's age, health status, lifestyle and risk of exposure. Please consult and discuss this with your veterinarian!
