

**DELIVERING BEYOND THE ORDINARY**

**SCHEDULE A**

**FUEL SURCHARGE APPLICABLE TO LOCAL DELIVERY ONLY**

The application of any fuel surcharge will be determined by the “national U.S. average” price per gallon based on the Department of Energy (DOE) Energy Information Administration’s (EIA) survey of “Weekly On-Highway Diesel Prices” for the first Monday of each month. This price may be obtained by calling the DOE Fuel Hotline at 202-586-6996 or via the DOE Internet web site at [www.eia.doe.gov](http://www.eia.doe.gov). In the event that the first Monday of the month is a Federal holiday, the fuel surcharge will be based on the DOE price available on the next subsequent business day (Tuesday). The “national U.S. average fuel price”, as determined above, will be applied to the fuel price adjustment ratio matrix shown below to determine the applicable fuel surcharge percentage that will be effective the 15<sup>th</sup> of that month through the 14<sup>th</sup> of the following month. The resulting charge is in the addition to all other applicable transportation charges.

If the DOE fuel price per gallon exceeds \$4.030 per gallon, the 29% fuel surcharge will be increased by an additional 1% for every 10 cents per gallon increase.

The 153 Group, reserves the right to adjust the fuel surcharge within a month if the DOE weekly price at any time during the month has increased to the point that a higher fuel surcharge would apply. For example, if the fuel price has effective July 2 is \$3.648 and thus the fuel surcharge beginning July 15 is 26%, but the fuel price effective July 23 is \$3.783, The 153 group may adjust the fuel surcharge to 27%
