

Hello Everyone,

Am by the names of Kwizera Nzaramba Chelsea, I live in Rwanda with parents and siblings. Am so pleased to write this thanking the ministry called help for humanity for the help and their kindness they showed me together with my family. When I finished my secondary, we were worried of how to get my school fees so that I can start my university but Help for humanity came a long and they became our blessings because now am studying in a good university here in Rwanda and am remaining with few courses to finish my university. Which is giving me a line for my future and build my own life. Which help for humanity showed me that my future can be perfect as I wished for it to be.

Soon I will get my bachelor's degree and start working at higher companies which I thank God and the ministry he passed through which is help for humanity to make my future so bright and perfect for me and people around me which are my family people.
