## **Jim Corbett With Package For 2N / 3D**

### **Overview**

Corbett is located on the foothills of the Himalayas in Uttarakhand, spread over three districts, viz. Pauri, Nainital and Almora. The terrain is undulating with several valleys. The rivers Ramganga, Pallaen, and Sonanadi flow through the valleys. By and large, the reserve is spread over Bhabar and the lower Shivalik region with a deep water table. The tract is porous with boulders and sand deposits.

Named after the famous British hunter turned author and naturalist, Corbett National park is one of the oldest National parks in India. The reserve is lush with diverse flora and fauna, situated in the sub-Himalayan belt. It is a major ecotourism destination that features beautiful landscapes and dense forests.

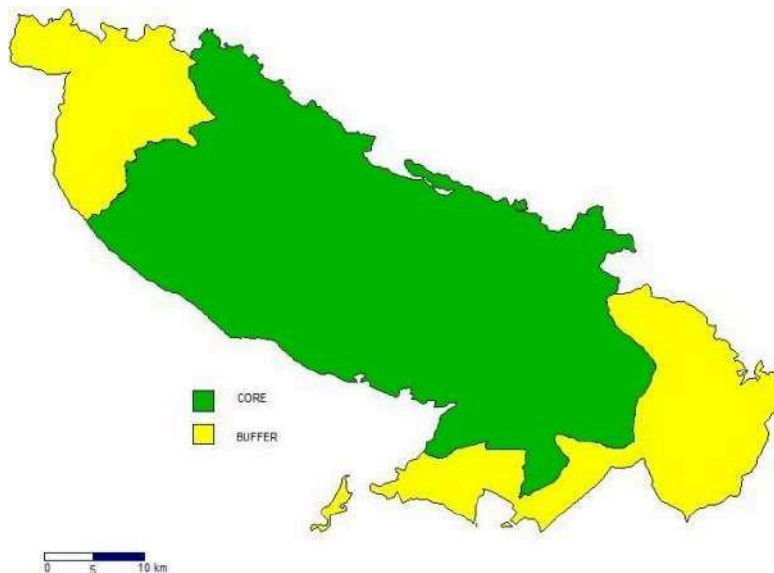

Corbett National park was the first tiger reserve under the Project Tiger in India. It is an abode for many majestic animals like the Asiatic Elephant, Royal Bengal Tiger and many other wild animals. Exhilarating terrain, streams and rivers portrays the bounty of nature in this land. A large number of tourists turn up every year at this National Park to experience the abundance of mother nature. Open jeep safaris and the walk along the forest pathways is an enthralling experience. However, keep in mind that the park is open only from November to June.

## Area of the tiger reserve

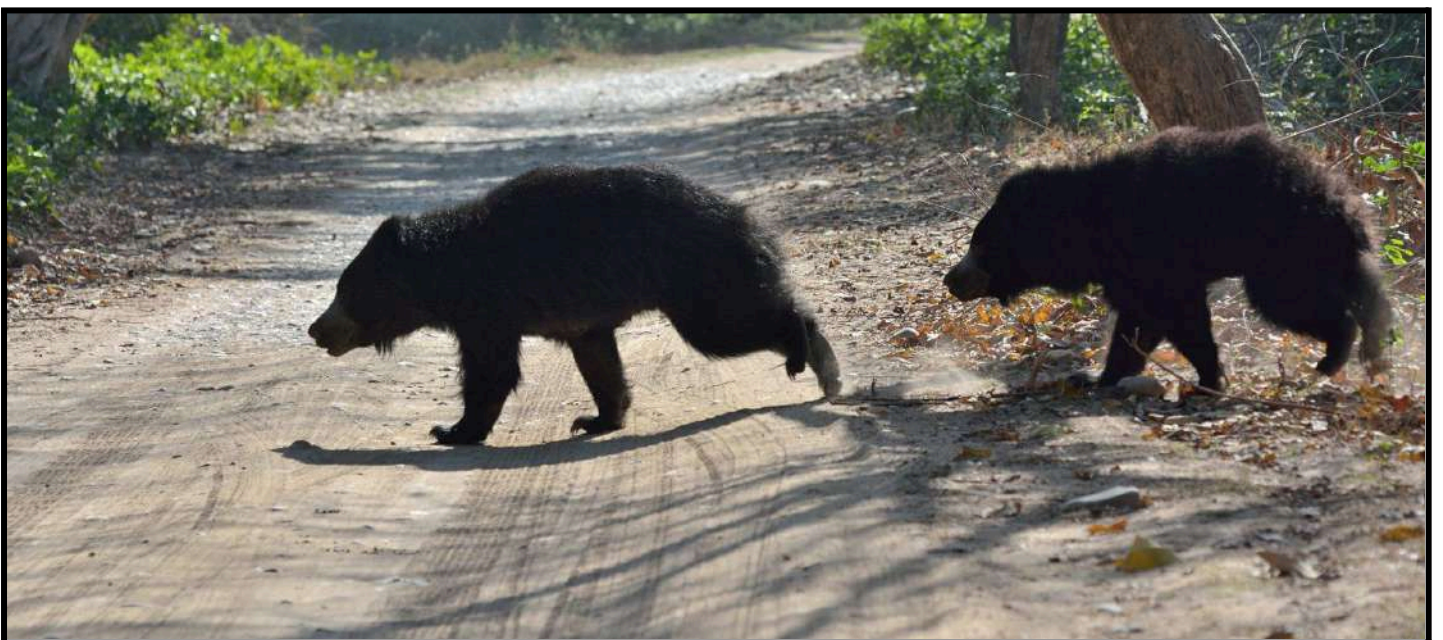

Core/critical tiger habitat	:	821.99 sq.km.
Buffer/peripheral area	:	466.32 sq.km.
<b>Total</b>	:	<b>1288.31 sq.km.</b>
