

What should I expect?

At this point our beef are all locally raised Corriente cattle. The Corriente is a smaller framed beef than what one will see in a typical beef and is naturally leaner – even the grain fed will be a leaner beef than most. The live weight on a grass fed will be around 700# and the grain fed around 900#. Compare this to most grain fed animals at approximately 1300#. Please expect smaller sized steaks etc than what you may have had in the past.

### Grass Fed Half Beef

These are approximate amounts based on what our beef has yielded in the past. Please keep in mind you are only charged for the weight you actually receive

**Total weigh of approximately 120 pounds**

- 47# burger
- 32# of roasts
- 28 # of steaks – T bone, tenderloin, sirloin and ribeye
- 13# of ribs, brisket, tri tip etc

### Grain Fed Half Beef

These are approximate amounts based on what our beef has yielded in the past. Please keep in mind you are only charged for the weight you actually receive

**Total weigh of approximately 160 pounds**

- 63# burger
- 43# of roasts
- 38 # of steaks – T bone, tenderloin, sirloin and ribeye
- 16# of ribs, brisket, tri tip etc

### Standard Cutting and Packaging

- Ground beef in 1# packages - tubes
- Steaks 2 per pack - Cryovak packaging
- Roasts approximately 3# per package and ribs will be about 2.5#. – Cryovak packaging
