Chad,

I wanted to express my gratitude to you and your staff for the excellent remodeling job that was performed at our office. From the beginning you organized the project with all the sub contractors so smoothly that everything went together perfectly!. I can not remember that ever happening in our unique office!

The project was stress free on our side because of the leadership you provided. The sub contractors were on time, clean and considerate to ours and our patients needs. It's not easy to provide services while the business is still operating on a daily basis.

Your design and attention to detail completely changed the operatory to an up to date modern space that will provide many years of service. The cabinets were well thought out and beautifully designed.

At a time when supplies and contractors are in short supply the project ran on schedule and met all our needs.

We appreciate everything that was done on your end to make this a successful remodeling project!

Sherry
