COCOON VS. Competitor's

COCOON SURPASSES THE COMPETITION BY:

- + BEING LIGHTER
- + EMITTING LOWER RADIATION DOSAGES
- + PROVIDING THE **TRUE ONE-HAND X-RAY SHOT**
- + ALLOWING 5X AS MANY SHOTS PER FULL BATTERY CHARGE

TRUE ONE-HAND SHOOTING

COCOON PRODUCT USE

DENTAL

WHEN
X-RAY
MOBILITY
IS NEEDED
MOST

Frequent X-RAYS are important as a progress check in many dental surgical operations, but moving a patient under anesthesia for a wall-mounted X-RAY is not only inconvenient and time consuming for the doctor, but risky for the patient.

But **COCOON** portable handheld X-RAY device allows for true one-hand portable X-RAY shots, as many as 500 shots before recharge, for more efficiency for dentists and oral surgeons. The operator is also protected by advanced safety features.

VETERINARY

WILD / DOMESTIC

Whether a horse at the track, elephant at the zoo or cattle on the farm, inspecting wild animals requires the highest level of maneuvering to allow for the quickest diagnosis without further agitation of the animal.

COCOON portable handheld X-RAY device provides vets instant and accurate diagnosis on-site, eliminating the need to transport big animals for body and oral X-RAY imaging.

Pets requiring examination for illness or infection face risk of high radiation exposure, especially small pet oral scans, in many pet clinics.

But **COCOON** portable handheld X-RAY device uses low radiation, avoiding unnecessary exposure for furry family members.
