HINA RENEWABLES

Creating and Storing Clean Energy
Mechanical, HVAC, Plumbing
and Electrical Contractor

HINA RENEWABLES

We at HINA RENEWABLES pride ourselves on building **Energy Storage Systems and Solar Systems** that are durable and designed to last. These days electricity is a necessity, and this is why reliability is our top priority when designing our systems. Our systems go through rigorous testing to ensure it can withstand years and years of use. HINA is also a full-service **Design/Build Mechanical, HVAC, Plumbing and Electrical (MEP)** Contractor, and specializes in service contracts, design/build, lump sum and IDIQ multi-year contracts to federal, state and local government entities, industrial and commercial customers. HINA provides state-of-the-art specialty contracting and design solutions to all clients in a professional and cost-effective manner. Services offered are:

- Design/Build Solar, Battery, and Energy Systems
- EV Charging Stations – AC and DC Electrical Power for Recharging
- Engineers Continuously Test New Hardware and Software
- Design/Build Services for all Mechanical and Electrical Systems
- HVAC / DDC Installation, Retrofit & Renovations (Any Size & Type)
- Computer/Data Room Temperature and Humidity Controls
- Ductless Split/Mini Split Systems (Mr. Slim, City-Multi, VRF, etc.)
- Preventative Maintenance and Energy Efficiency Programs

USA Based Energy Storage Company

Our energy storage company is located in Utah. We pride ourselves on building energy storage systems that are durable and designed to last. Our systems go through rigorous testing to ensure it can withstand years and years of use. HINA has built their business and reputation on quality, integrity, and demonstrated performance.

HINA adds super cool electricity management function to its energy storage system

Off-Grid Solar generators that are powerful, portable, safe, silent & 100% fume-free

GENERAL SERVICES

➔ **LET YOUR SOLAR SYSTEM WORK FOR YOU AND NOT THE UTILITY COMPANY.** With our technology, the customer no longer needs to be concerned about start up surges damaging electronic devices. Our Pure Sine Wave Inverters will seamlessly run loads when your power utility goes down and our Energy Storage Systems (ESS) will keep you up and running. Our engineers continuously test new hardware and software to stay one step ahead of battery storage.

➔ **OUR TECHNOLOGY IS COMPATIBLE WITH YOUR CURRENT SOLAR INSTALLATION.**

Our ESS technology is designed to retain and advantages of being linked to the grid while also allowing other sources of power to plug into the inverter. This includes gas generators and wind turbines.

99% of solar panels installed in the USA Are tied directly into the grid.

➔ **NO JOB IS TOO SMALL OR TOO LARGE.**

We accept **Government IMPAC** (International Merchant Purchase Card). These charge cards are used by the U.S. Federal government to pay for micro-purchases for goods and services. We can perform small service task orders for as little as \$100 at any government facility throughout Utah and the Intermountain West.

Give us an opportunity to show you the quality work we do within your budget!
