

Long Range Bluetooth Portable RFID Reader

R-3600-BT

(Several Versions Available)

The R-3600 Bluetooth Portable Reader is designed for fast and automatic collection of data from 1st Choice Asset, Vehicle and Personnel ID Tags. The R-3600-BT can be a tool for risk management in areas such as lone worker protection, guard tours and janitorial services in schools, commercial buildings and shopping centers, as well as an activity and alarm recording device for waste collection, route sales, taxis, school buses, and service vehicles.

Small in size with rechargeable batteries, the R-3600-BT Reader can last 24 hours per charge. It works with any cellular Android Tablet or Phone and the data can be automatically uploaded to any central control software, or sent by text message or cell call at any time.

Features:

- * Up to 24 hours of battery life per charge
- * Records first seen / last seen of every Tag ID received
- * Records all arrival as well as departure transactions
- * Auto upload of data & alarms by text message or cell call
- * Optional Android Tablets and Cell Phones available
- * Duress, Tamper and Motion Tag Alarms are sent to any Android or GPS Device
- * Tag data reports shown on any Android Device
- * Manual power on switch
- * Small in size - ready to use with belt clip
