

### Personnel or Patient Bracelet Tags

T-7000 Bracelet Tags

The T-7000 Personnel Bracelet Tag is a Long Range RFID tracking bracelet used in Patient, Medical and other real time Occupational Health and Safety Tracking Applications

The T-7000 is attached to a person's wrist or ankle using standard hospital type ID straps. Tags can be chemically sterilized and worn in the bath or pool.

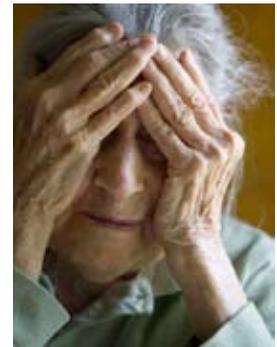

Tags can be monitored at all times and tracked for security and OH&S or simply detected when a person or child approaches certain doors or controlled areas (such as patients or children "wandering" away from safe areas or approaching facility exits).

### Features:

- \* Continuously monitored and tracked to detect when wearer approaches designated area zones
- \* Unique sleep feature provides battery life up to 6 years.
- \* High impact resistant UV stabilized PVC case ultrasonically welded and sealed. Weatherproof and suitable for wearing in the shower, pool or bath.
- \* Also transmits 26-bit Wiegand coding for use in access control systems
- \* Compatible with 1st Choice Software applications including MineTrac, MediTrac, LogiTrac, SecurityTrac, PatientTrac, as well as all Access Control and most time / attendance systems.
- \* Tags can be chemically sterilized
- \* Use Standard Hospital Bands

1st Choice T-7000 Tags are available with built-in HID Prox, iClass, MIFARE, DESFire and most passive RFID credential chips by other manufacturers. This allows the T-7000 Tag to be a patient tracking and emergency evacuation identifier and access control smart card all in one "wrist watch" size credential.

Also available is the T-7050 Duress Patient Tag which includes a built-in push button for manual call applications such as duress and emergency help applications.

### Tag Specifications

TX Frequency.....433.92 Mhz  
ERP.....< 300 Micro Watts  
Operational Temperature .... - 40° to +140°F  
Size..... 39 x 38 x 13 mm  
Weight..... 15 grams  
Battery..... Internal Lithium  
Material.....UV Stabilized PV C (IP65)  
Read Range..... Adjustable from 2"-200'  
\*This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules.
