

”

Tracy was professional, kind & fun! Every day I came home from work I was completely amazed at how much was done.

Tracy helped me come up with the layout, made sure I had a storage space, (which I needed and did not think about) helped me pick out colors, gave me the idea of an accent wall and installed it perfectly. And even went shopping found my cool bar stools and furniture!

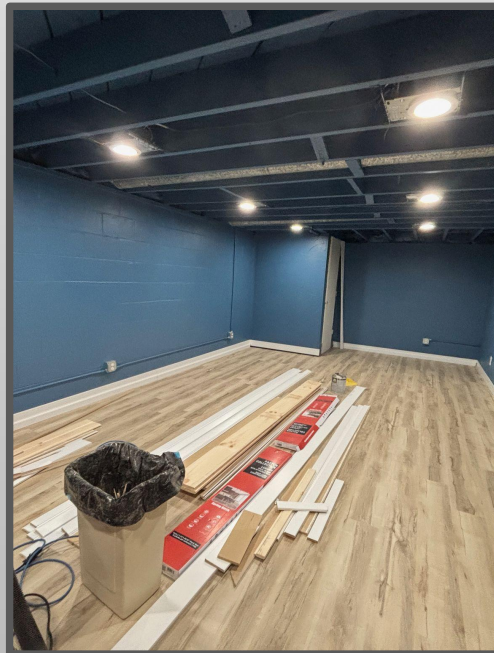

During the entire project Tracy kept me informed, asked me questions about things she thought I might like and just handled everything, including subcontracting the electrical to be installed.

The project was completed on time for my Birthday & Christmas party! Thank you Tracy!

Tracy recently installed new baseboard as part of a large flooring replacement project. She expertly and creatively addressed tough transition areas and challenging existing conditions, resulting in a beautiful finished product.

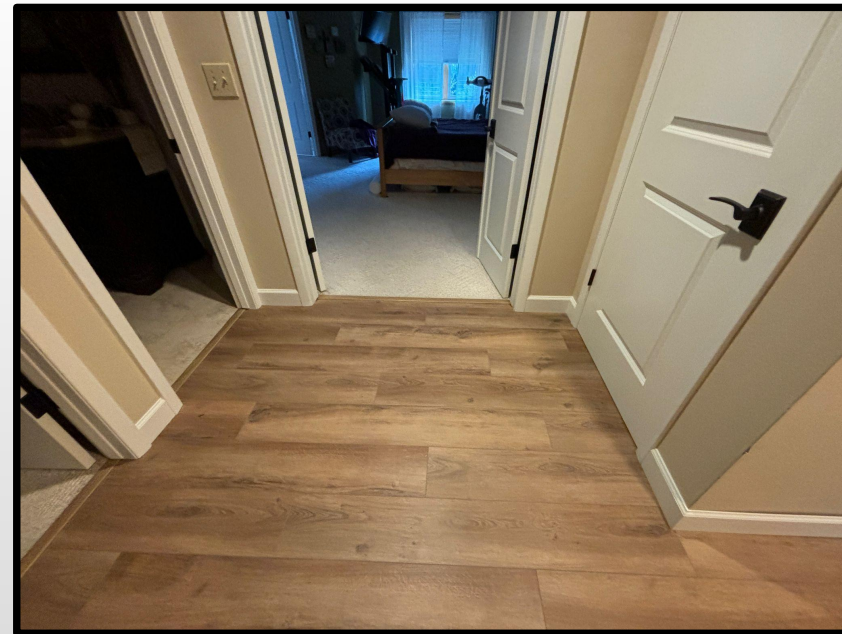

She also installed new door hardware and repaired a number of drywall openings which included texturing the wall to match existing finish. The painting contractor was impressed when they could not tell where the previous openings had been.

In past projects Tracy has installed floor tile and provided painting services to my home. Her attention to detail and desire to please her clients sets her apart.

I would not hesitate to call her for any project.

” I was impressed with how hard Tracy worked on my project!

My family and I were on vacation the week this project was being done. All my neighbors at the lake are retired and when we returned home they all made it a point to come over and go on and on about how hard and long Tracy and her helper worked. My wife and I really enjoyed hearing all the feedback and when the grass started to come in it was beautiful.

But more importantly, when the rain came, NO WATER!! Worth every penny to not have to slush through the little “lake” to get to the big “lake”!!

Tracy also left us a wonderful surprise. She had to move our swing from the end of the yard by the lake to do the work, when we came home it was repositioned back in place on pavers with beach pebbles all under and around it instead of sinking into the ground! It was a WOW!! factor.

Call Tracy when you need anything done!
